

webMethods 7 Certified BPMS Developer

EARN THE RECOGNITION YOU DESERVE

Are you the kind of person who doesn't stop at merely performing your daily tasks? Do you continue to expand your knowledge to be the best you can be? Then becoming a Software AG webMethods 7 Certified BPMS Developer is the next essential step in your career.

You can register online for the test at:
www.softwareag.com/certification

This proctored examination is designed for the experienced webMethods BPMS developer. It is web-based multiple-choice test contains approximately 75 questions and must be completed in 120 minutes. To pass the test and receive certification, you must score a 70% on the test.

The certification test is practice-oriented and simulates situations typical of BPM projects. Depending where you start, it tests your Software AG knowledge in all areas that are important for the understanding of the Process Engine, Task Engine, and the use of the Designer development tool to the Integration Server and Optimize for Process components. Also, on monitoring with the My webMethods Server and on how to configure optimized business processes for performance, security, and error handling.

KEY BENEFITS

- Enables developers to deliver better quality BPM projects
- Provides a means of measuring and validating Software AG competency
- Improves employee retention with professional development paths
- Increases project team members' productivity
- Builds credibility, customer confidence and competitive differentiation
- Increases individuals long-term career and professional development
- Establishes differentiation amongst peers
