Are you the kind of person who doesn't stop at merely performing your daily tasks? Do you continue to expand your knowledge to be the best you can be? Then becoming a Software AG webMethods 8 Certified ESB Developer is the next essential step in your career

You can register online for the test at:  
[www.softwareag.com/certification](http://www.softwareag.com/certification)

This proctored examination is designed for the experienced webMethods ESB developer. It consists of 50 multiple choice questions across a range of ESB development topics. Examinees are allowed 150 minutes to complete the exam. No course completion is required to sit for this exam, but prospective examinees are strongly recommended to have completed the following course:

- webMethods 8 Integration Workshop

The Software AG Certification Program establishes a standard for knowledge and skills necessary to successfully implement and maintain mission-critical IT systems in organizations using Software AG technology. All certifications offered by Software AG attest to a high level of proficiency as a developer of IT applications based on webMethods, ARIS, Natural, and Adabas.

Software AG is the global leader in Business Process Excellence. Our 40 years of innovation include the invention of the first high-performance transactional database, Adabas; the first business process analysis platform, ARIS; and the first B2B server and SOA-based integration platform, webMethods.

### KEY BENEFITS

## PREREQUISITES AND DEPENDENCIES

The scope of the test is webMethods ESB 8.0. The test assumes a general understanding of Java, Web services and Internet technologies, as well as specialized knowledge of ESB development.

The test is designed to test for skills of how to implement the webMethods ESB in an organization.

## PREPARATION GUIDELINES

Successful completion of the webMethods 8 Certified ESB Developer certification test requires a solid knowledge in using webMethods ESB, as can be acquired through Software AG training courses and through practical experience.

While the suggested resources can assist you in preparing for the test, it is imperative that you have hands-on experience developing and/or maintaining ESB projects since this is a practice-oriented test.
