

ARIS 9.x Design Platform Delta Training

ARIS 9 combines 20 years of Business Process Analysis (BPA) experience with the latest technology trends. ARIS 9.x also opens up process improvement to anyone. To make this possible, Software AG made ARIS easy to use, smarter to run and more powerful to improve processes. This course provides you with all information to use and administer ARIS 9 successfully, based on your previous ARIS 7.x skills. You'll learn about all new and enhanced features of ARIS 9 and get a detailed understanding of the capabilities of ARIS Connect, the new product in the ARIS family allowing enterprises to unlock the power of social collaboration for business and IT improvement.

Objectives

At the end of this course, you will be able to:

- use ARIS 9.x as a modeler or business process administrator

Software versions covered

- ARIS 9.x
