

# webMethods 7.x Certified Integration Developer

## EARN THE RECOGNITION YOU DESERVE

Are you the kind of person who doesn't stop at merely performing your daily tasks? Do you continue to expand your knowledge to be the best you can be? Then becoming a Software AG webMethods 7.x Certified Integration Developer is the next essential step in your career

You can register online for the test at: [www.softwareag.com/certification](http://www.softwareag.com/certification)

This proctored examination is designed for the experienced webMethods integration developer. It is web-based multiple-choice test contains approximately 75 questions and must be completed in 120 minutes. To pass the test and receive certification, you must score a 70% on the test.

The certification test is practice-oriented and simulates situations typical of integration projects. Depending where you start, it tests your Software AG knowledge in all areas that are important for the understanding of the Broker Publish & Subscribe message exchange patterns, JMS and the use of the Developer and Designer development tools to the Integration Server component and Adapters and Trading Networks. Also, My webMethods Server, Monitor and how to configure services for performance, security, and error handling.

### KEY BENEFITS

- Enables developers to deliver better quality integration projects
- Provides a means of measuring and validating Software AG competency
- Improves employee retention with professional development paths
- Increases project team members' productivity
- Builds credibility, customer confidence and competitive differentiation
