

U.S. Civilian Agency Solutions

MEET YOUR AGENCY'S GOALS—FASTER—WITH SOFTWARE AG USA

Every civilian agency has a different mission. Yet each aims to deliver timely, secure and accurate services while keeping customer satisfaction high. That's where Software AG's webMethods technology comes in.

Increase your service levels—and your efficiency—by using the proven webMethods platform. We are dedicated to helping your agency deliver quality information, faster, more effectively and more accurately.

For more than 30 years, Software AG USA has helped civilian agencies achieve their goals more efficiently. In fact, our technology is at the core of key programs across the U.S. government, including OPM, DOT, IRS, USDA, EPA, DOI and NARA, as well as at dozens of state and local government agencies.

Our proven integration-centric platform can help your agency:

- Eliminate the costly maintenance of point-to-point integrations across your application portfolio
- More easily share data across your agency, with constituents and other agencies as well as between levels of government

- Reduce redundant systems—and implement common re-usable services
- Model, automate and continuously improve processes within your enterprise and with partners—increasing agility and reducing costs
- Leverage and re-use your existing IT investments, including mainframe technologies such as COBOL, Natural, DB2, IMS and Adabas, to create new time-saving business services

PROOF OF SUCCESS

Our successes with civilian agencies include:

- Providing an integration platform that delivers high availability and fast delivery needed for tax e-filing.
- Delivering a BPM solution to support the transfer, inspection, archiving and retrieval of all federal records.
- Supplying a registry/repository that provides quality environmental information between entities, fostering greater collaboration and timely data sharing.

Ask how we can meet your specific challenges.

CHALLENGE US!

Put our team to the test

At no cost to you, Software AG USA will demonstrate how the webMethods suite can answer your integration or process improvement challenge.

Step 1: During a free ValuePath Workshop, our seasoned experts will conduct a discovery session to assess your current environment, processes and requirements.

Step 2: Based on that data, our technical team will conduct a free Proof of Value, using one of your processes. At your site, we will present our analysis, including:

- Potential roadmaps to achieving measurable improvements
- Recommendations for leveraging best practices
- Demonstration of our technology applied to your process and data

See how quickly you can achieve results with webMethods. Ask your Software AG USA representative for details.

WHY YOU CAN COUNT ON SOFTWARE AG USA

Leadership—Software AG is one of the 25 largest business software vendors in the world. Our top-ranked webMethods suite is consistently recognized as a leader by Forrester, Gartner and the analyst community—specifically in integration, SOA governance and BPM. We are the #1 vendor worldwide in SOA governance. Our planned acquisition of IDS Scheer establishes global leadership in Business Process Excellence.

Proven results—Now more than ever, federal IT organizations seek new ways to reduce costs and maximize current IT investments. That's precisely what you can do with Software AG technology. Our webMethods suite integrates virtually any existing IT asset to facilitate efficient information sharing—and it's proven, processing billions of transactions each day.

Stability—Software AG has more than 40 years of global IT experience, serving leading enterprises in public and private sectors in 70 countries. Our standards-based webMethods technology was built from the start to integrate any systems. New webMethods innovations work seamlessly with our core integration product. We make investments last!

ACHIEVE YOUR MISSION—FASTER

With Software AG's webMethods technology, you'll know what is happening across processes, in real-time, and you'll be able to predict what's coming next. Our standards-based COTS solution offers a single, cohesive, modular platform, incorporating:

SOA Infrastructure & Governance—Leverage the market's leading governance and lifecycle management cycle solution to develop service consistently, promote re-use and react quickly to change. Our integration platform is truly agnostic. Integrate any system, including COTS or GOTS applications, SAP, Oracle, IBM, J2EE, .NET and custom apps.

Business Process Management (BPM)—

Automate processes to streamline operations. Software AG combines traditional process automation with a powerful predictive analytics engine so you can monitor and improve processes in real-time. Now with the ARIS Platform, we offer even more ways to help you model and continuously optimize your processes.

B2B integration—Software AG is a leader in B2B integration and messaging, enabling event-driven collaboration across the supply chain. Use a single B2B gateway to transact across departments and with mission partners without worry of file size, format, reliability or security. Increase visibility of entire B2B processes, end-to-end.

Business Activity Monitoring (BAM)—Powerful dashboard capabilities give you real-time analytics with predictive alerting for unprecedented insight into your operations. Use BAM to measure Key Performance Indicators (KPIs) and know where to make system improvements.

Software AG USA has 30-plus years of experience working with the U.S. federal government.
