

## Defense Logistics

### FACILITATE COLLABORATION AND REAL-TIME VISIBILITY ACROSS THE SUPPLY CHAIN

In support of the warfighter, it's critical to not only standardize operations, but also to promote interoperability across all defense logistics channels. Large investments in ERP systems or other IT systems and applications have already been made to address this issue. However, these systems tend to be stove-piped, making it difficult to integrate your supply chain processes and support incremental improvements. Your challenge is to modernize your supply chain process while leveraging the investments you've already made.

#### Interoperable shared services that can react in real time to demand

Software AG can help you modernize logistics processes by improving joint deployment, rapid distribution, agile sustainment, and multi-national logistics capabilities. Our solutions enable logistics transformation through real-time situational awareness.

Software AG's advanced Business Infrastructure Suite allows government agencies to

deliver strategic applications faster. You'll know what is happening across processes, in real time, and be able to predict what is coming next.

Software AG Business Infrastructure Suite is a COTS solution that integrates logistics services through the use of standards, automates supply chain processes, such as procurement to payment, and provides real-time visibility into demand levels. Within a single, cohesive, modular platform, our suite delivers:

- **Service-Oriented Architecture (SOA)** - Leverage award-winning, standards-based integration and web services management to create an enterprise architecture that is interoperable, promotes re-use, and can react quickly to change.
- **Supply chain integration** - Software AG is a leader in B2B integration and messaging, enabling event-driven collaboration across the supply chain within both government and commercial accounts. Our platform uses existing IT assets, regardless of the

environment (SAP, Oracle, IBM, J2EE, .NET, etc.) to facilitate information-sharing across systems and agencies.

- **Automated business processes** - Our Business Process Management (BPM) capabilities let you quickly model and automate new processes, including existing manual processes. And, Software AG combines traditional process automation with a powerful predictive analytics engine to help agencies monitor and improve processes in real time.
- **Business Activity Monitoring (BAM)** - Our powerful dashboard gives you real-time analytics with predictive alerting for unprecedented insight into your supply levels and operational availability. Through role-based autonomic logistics, you'll be able to see patterns of use and predict when supply levels are low whether you are deployed, in theater, in garrison, in training, or in peacetime.

## With Software AG's proven Business Infrastructure Suite you can:

- Modernize existing processes or systems across all services
- Enable collaboration across all DoD services and NATO and multinational services
- Obtain near real-time command and control of the logistics pipeline
- Increase asset visibility (Transportation, Medical, Personnel, Supply, Engineering, Maintenance, Acquisition, Finance)
- Close the link between command and control and combat support
- Predict and respond to demand through real-time monitoring
- Establish controls to audit and adhere to standards across all processes
- Gain agility to change processes on-the-fly
- Get the right information to the right person with role-based dashboards
- Make continuous improvements to processes without affecting the underlining systems through the use of SOA

Create a fused picture of combat support for course of action development, analysis, and collaborative planning, and deliver NetCentric services to the edge.

## A proven and trusted choice

Our dedicated government practice and leadership in supply chain solutions for leading Fortune 1000 companies is evident through the success of our customers, such as:

- Defense Logistics Agency
- DoD eMall
- Defense Finance & Accounting Service
- Internal Revenue Service
- Small Business Administration
- U.S. Agency for International Development
- U.S. Army
- U.S. Navy
- U.S. Intelligence Community
- U.S. Department of Transportation
- U.S. Agency for International Development
- U.S. Forest Service
- Georgia Technology Authority
- Fairfax County (VA) Public Schools
- Motorola
- Johnson & Johnson
- Canadian National Railway
- FedexKinkos
- Dell
- HP
- France Telecom
- Vodafone
- Unisys

Software AG is the trusted choice among leading government consultants and systems integrators, such as:

- **Accenture**
- **Bearing Point**
- **Booz Allen Hamilton**
- **CGI – AMS**
- **CSC**
- **Deloitte**
- **EDS**
- **SAIC**

Take the next step to get there - faster.
