

MITA Brief

HOW TO FIND YOUR PATH TO A MITA FRAMEWORK

IS ACHIEVING A MITA FRAMEWORK DIFFICULT AND TIME-CONSUMING?

- Is it challenging to keep pace with changes in healthcare legislation and policy?
- Do siloed systems slow down processes and require duplicate data entry?
- Are changes to your current systems extremely labor-intensive and costly?
- Are you struggling with how MITA can be extended across your enterprise and how to share the benefits with other agencies?
- Are you struggling to illustrate measurable results and provide visibility into your processes?

Find a more efficient path to MITA—work with Software AG.

Legacy and siloed systems do not allow for timely and efficient change that is necessary to keep pace with today's healthcare demands. This puts state agencies at risk. You can reduce this risk by embarking on a path to MITA that employs a phased approach, assures easy re-use of your existing IT assets, provides highly effective governance and end-to-end visibility across the enterprise.

The path to MITA is complex and unproven. You can rely on Software AG's proven products and services that are based on market-leading SOA and enterprise integration capabilities to help you along your journey.

With Software AG, you can:

- Establish a comprehensive SOA governance to maximize service re-use
- Extend state IT investments by modernizing existing systems
- Increase process visibility and control so your agency operates more efficiently
- Measure business performance across the Medicaid enterprise

PUT EXPERIENCE ON YOUR SIDE

State and local government is our No. 1 vertical market in the U.S, where our technology is at work for agencies in 39 states as well as hundreds of local governments.

Our products comply with the Health Insurance Portability and Accountability Act (HIPAA), National Information Exchange Model (NIEM), as well as HL7 and X12 standards.

MITA offers states much more than a technical architecture or business process—it also offers the potential to reduce costs and improve the quality of care.

REAL SOLUTIONS FOR YOUR MITA CHALLENGES

YOUR CHALLENGES	SOFTWARE SOLUTION	HOW YOU BENEFIT
Aging systems can't keep pace with new healthcare demands	Modernization: Transform existing application assets into high-value business services and quickly build new processes using the webMethods Application Modernization Suite	Preserve and extend valuable core applications Transition easily to a flexible, scalable SOA Deliver high-performing and secure Web services
Separate systems, such as managed care, clinical support and data analysis, are patched together or hard-coded into MMIS Siloed systems require too much time and budget to maintain	Best-in-class SOA: Integrate information silos easily with the webMethods Enterprise Service Bus (ESB) Platform. Give structure to your MITA and catalog assets for re-use with CentraSite™. Gain real-time visibility into service performance with webMethods Insight	Govern the end-to-end SOA lifecycle Improve service re-use Head off potential performance issues Actively manage services with detailed run-time metrics
Lack of interoperability prevents information sharing between agencies and stakeholders No collective way to process Medicaid claims	Robust systems integration: Integrate your applications using the webMethods ESB Platform, which features high-speed messaging and support for B2B, EDI, legacy applications and event-driven technologies. Adapters facilitate system-to-system process tasks	Reduce time and cost to improve processes and integrate systems Securely support all integration patterns, including service-oriented, event-driven and enterprise application integration
Healthcare reform, universal coverage, consumer directed care and population health management require an agile IT infrastructure Lack of visibility into processes	Top-ranked BPM: The webMethods Business Process Management Suite (BPMS) includes cohesive tools for modeling, analysis, workflow design, user-interface design, governance and metadata	Achieve greater operational efficiency by automating system steps and guiding human interactions Write and modify rules to match changing requirements—without IT's assistance Show measurable results from your MITA implementation

GET THERE FASTER WITH SOFTWARE AG

Many application and database vendors provide disjointed tools that lock you into proprietary architectures or fall short of enabling an enterprise-wide SOA. Software AG is different. Our software helps you govern all IT assets and SOA processes, provides end-to-end lifecycle governance of your MITA environment, gives you deep visibility across your SOA and supports comprehensive service-enablement of applications across a wide range of platforms.

We can work with you or your integrator of choice to build a superior MITA solution—cost effectively.
