Strategic advantage from Purchase to Pay monitoring, just a matter of knowing where to look.

## Where do you start?

You are running your procurement operations on ERP software and now you are looking at solutions with which you can further improve the operations. But how do you pick the processes that merit your focus and attention? Lack of insight in processes make it difficult, if all not impossible, to choose the process to start with.

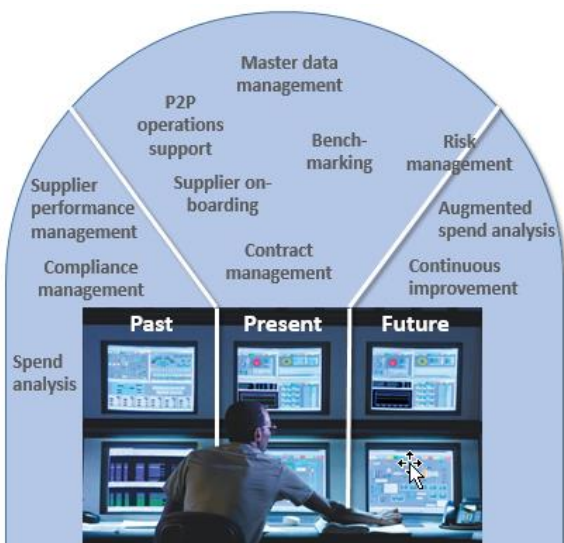

For any organization to manage their operations they should at least be able to:

- Have a complete transparent process.
- Understand how the system is actually used.
- Identify critical processes.
- Identify improvement areas.
- Monitor on selected KPI's and report / respond to them.

LAKRAN's Procurement Control Room is the solution for the topics described above as it is an approachable, user-friendly, flexible and intuitive solution via which any organization can gain full insight in their P2P operation.

Have you for example ever been interested to know if your organization is able to order first time right, e.g. to see the number of changes on a Purchase Order:

- Differentiated between divisions.
- Differentiated between document types.

## BUSINESS WHITE PAPER | LAKRAN's Procurement Control Room

- Identified by type of change.
- Who actually made these changes.

And all in one single, responsive dashboard!

### LAKRAN's Procurement Control Room

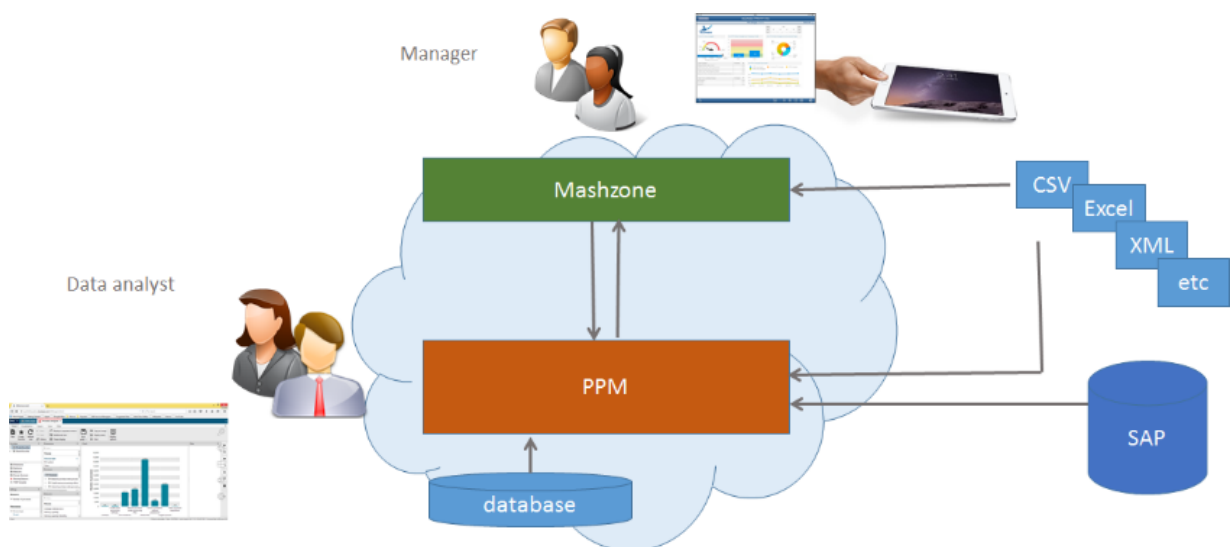

LAKRAN's Procurement Control Room is a cloud-enabled solution that provides procurement organizations with the intelligence that is required to discover how processes are actually used. With this knowledge any organization is able to determine the gap within the process design and to identify bottlenecks in the actual process, via which clear decision and corrective measures can be taken.

LAKRAN's Procurement Control Room gives transparency on every level of the organization:

- Visibility on managerial level: is the process supporting our strategy?
- Visibility on tactical level: where is process waste and how can we optimize?
- Visibility on operational level: how can I optimize my working day?

### How does it work?

Instead of implementing an entire reporting system or custom build solution, it is possible via an approachable solution to retrieve data from your own system and use this to create business insight.

### ✓ Benefit

- ✓ Compliance check if we work like we should
- ✓ Benchmark in/external process performance
- ✓ Automated bottleneck analysis

## BUSINESS WHITE PAPER | LAKRAN's Procurement Control Room

LAKRAN's Procurement Control Room is available as Managed Service cloud solution and as Self Service cloud solution. In both cases data is extracted from your P2P system and loaded into a secure cloud environment where it is stored and secured separately for each client. The data is analyzed according to predefined business rules and presented in a user-friendly and intuitive Procurement Control Room Dashboard.

The dashboard can be accessed either via a URL or directly via an App on your tablet.

### ✓ **Benefit**

- ✓ Online progress status available
- ✓ MashUp based on several Sources
- ✓ Dashboard on iPad makes business people more involved
- ✓ Better decision making

### **Interested**

If you are interested and want to see and discuss the potential of LAKRAN's Procurement Control Room for your organisation feel free to contact us. Via a live demonstration on an iPad we can show you the solution and answer any questions you may have.

## Company info - LAKRAN Procurement professionals

LAKRAN is built up around a group of highly motivated, hugely enthusiastic procurement experts. They all have different experiences, but one thing forms the common ground: resolving all sorts of issues in the world of procurement operations, and then usually the most difficult problems in execution and management, within the chain of events from requirement to paid invoice. Technology, transformation, transition, design and management: our curiosity made that we are experienced, our research forced the real understanding. Now the only thing left is delivering solutions to your organisation. Don't hesitate to reach out to us at <http://www.lakran.com/>

LAKRAN.
