

ARIS 10.0 SR24

New Features Overview

Ready for the next level

The new ARIS Release Moves ARIS to the Next Level

High-level priorities of ARIS 10.0 SR24

Process Mining

- Dynamic process perspective
- Next-gen Process Mining with Generative AI
- Process health check and comparison
- Enhanced dashboarding access
- Enhanced users and rights management
- Gallery process accelerators
- In-tool collaboration

R & C

- Risk & Compliance in ARIS Portal
- Multi-tenancy support for Risk & Compliance
- Self-service support for Risk & Compliance

Suite

- Customer requirements/ ideas

BPA

- Accessibility ARIS portal
- DMN in the web
- Merge to database in the web
- Modernized "Content Views" in ARIS Portal
- Modernized workflow design and process runtime in the web
- New Enterprise Portal search
- Repository capabilities in the web
- Web-based Admin capabilities for Enterprise SaaS
- WYSIWYG editor for ARIS Portal
- Spreadsheet modeling in the web

Automation

- SAP Cloud ALM support

Suite

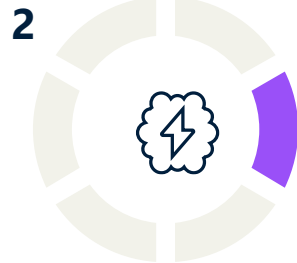

- Enterprise SaaS offering in shared cloud
- Reskinned ARIS suite
- Update experience & operation

The New ARIS Release Aims at Future-proof Customer Obsession

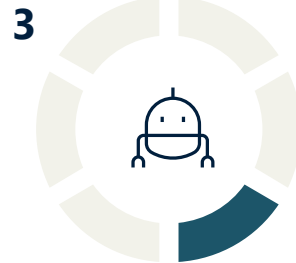

Value drivers

1 Customer requirements – Happy ARIS users

2 SaaS/Cloud readiness & integration of the full portfolio

3 Innovation & AI

4 User Interface & User Experience

5 Modernization and Total Cost of Ownership

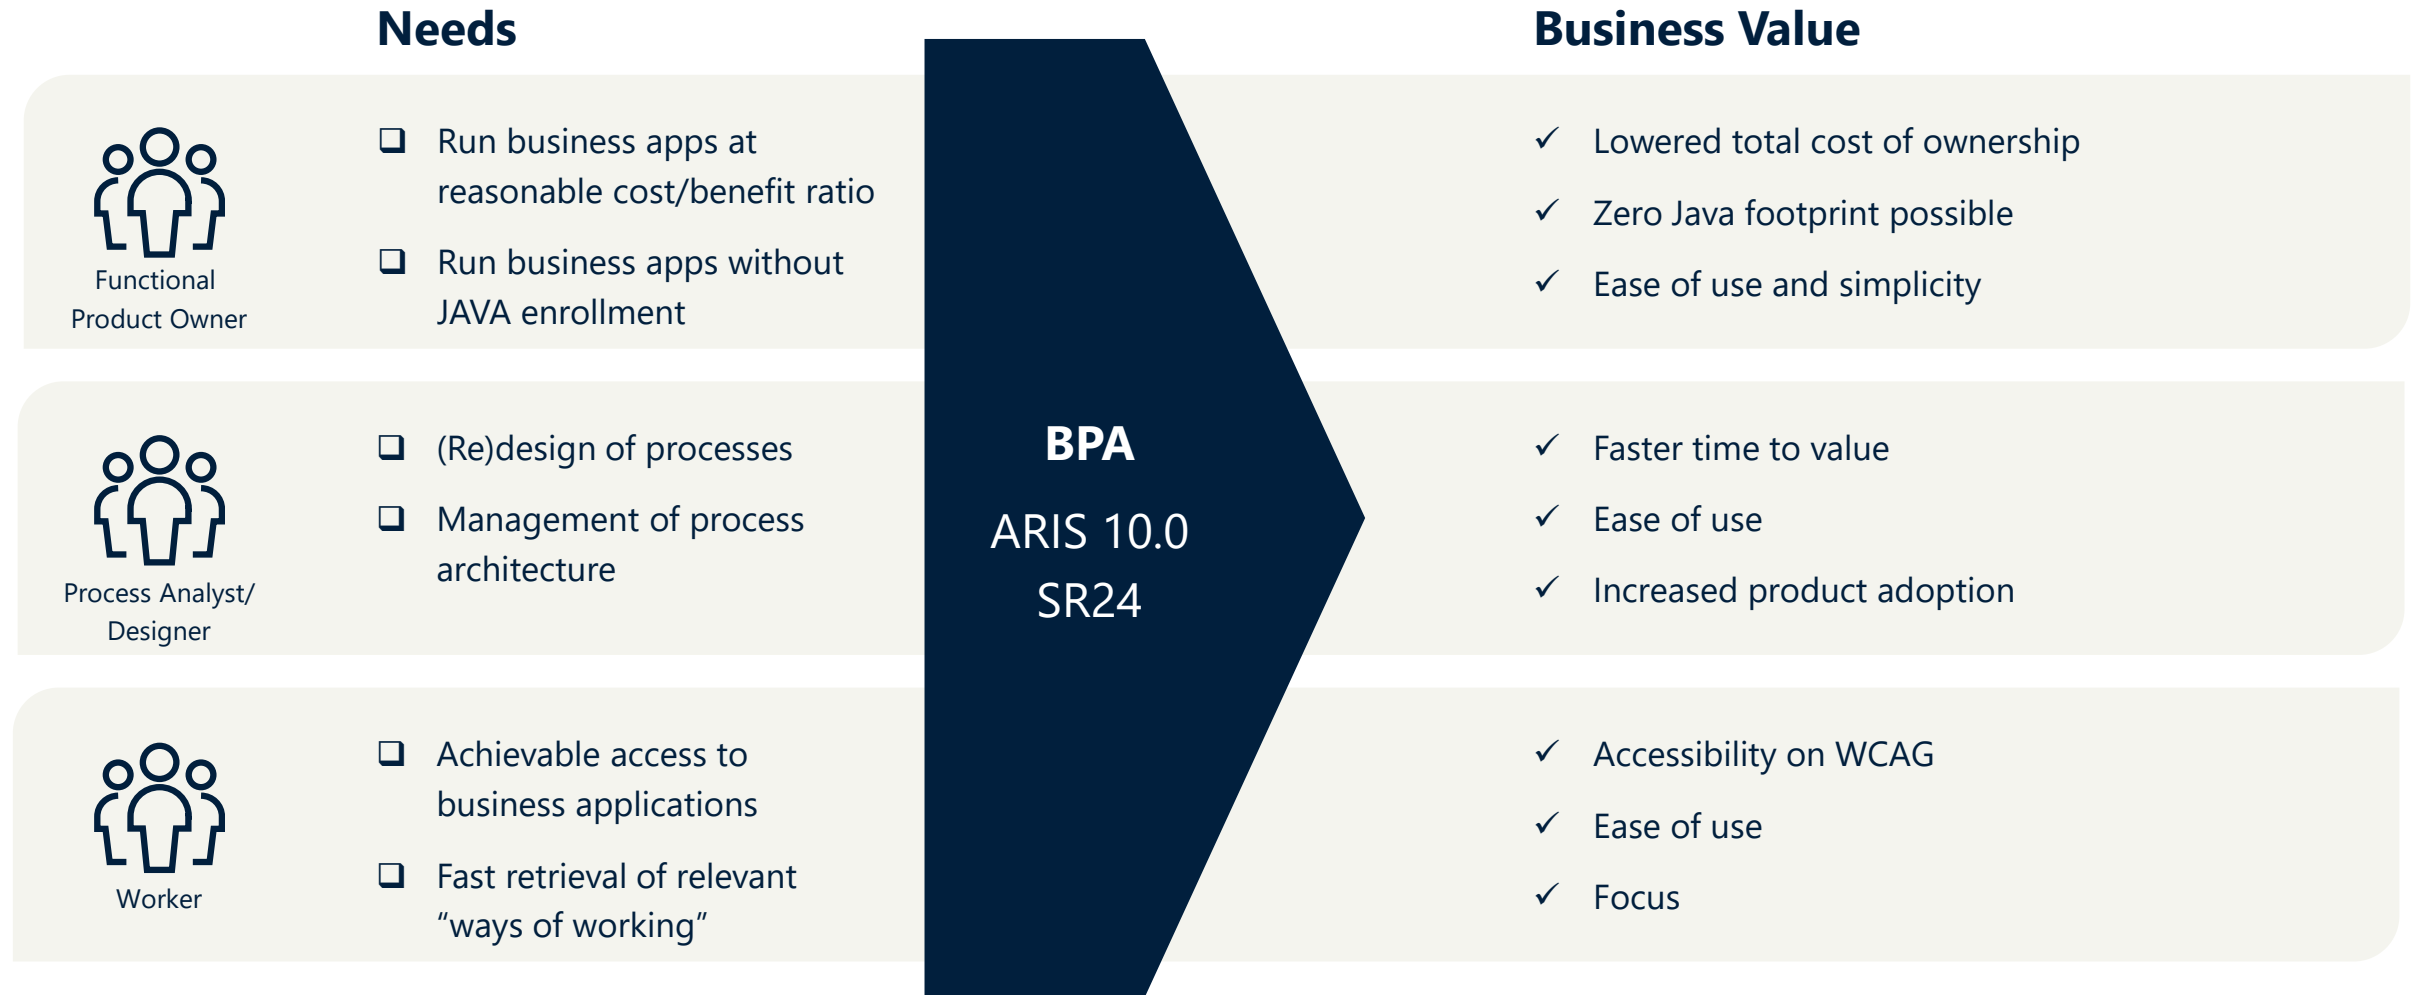

6 Technical Enhancements

Business Process Analysis

SR24

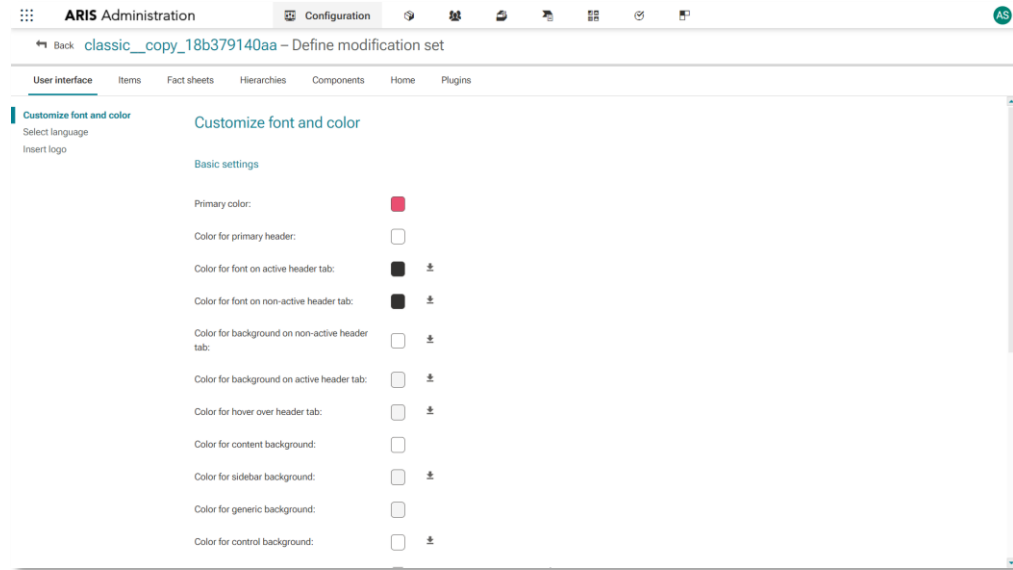

Who Will Benefit Most from the New ARIS Release?

Put yourself into the shoes of the following personas working with ARIS

Enhanced Look And Feel

Easily setup and administrate ARIS

DESCRIPTION

- › New standard colors
- › Integrated design for ARIS and ARIS Process Mining
- › Native support for white headers

TARGET GROUP | USE CASE

- › Customers requiring an easy to configure yet individualized solution

PREREQUISITES

- › Editions: Basic, Advanced, Enterprise
- › Products: All users
- › Other: Setting up the white header requires admin privileges

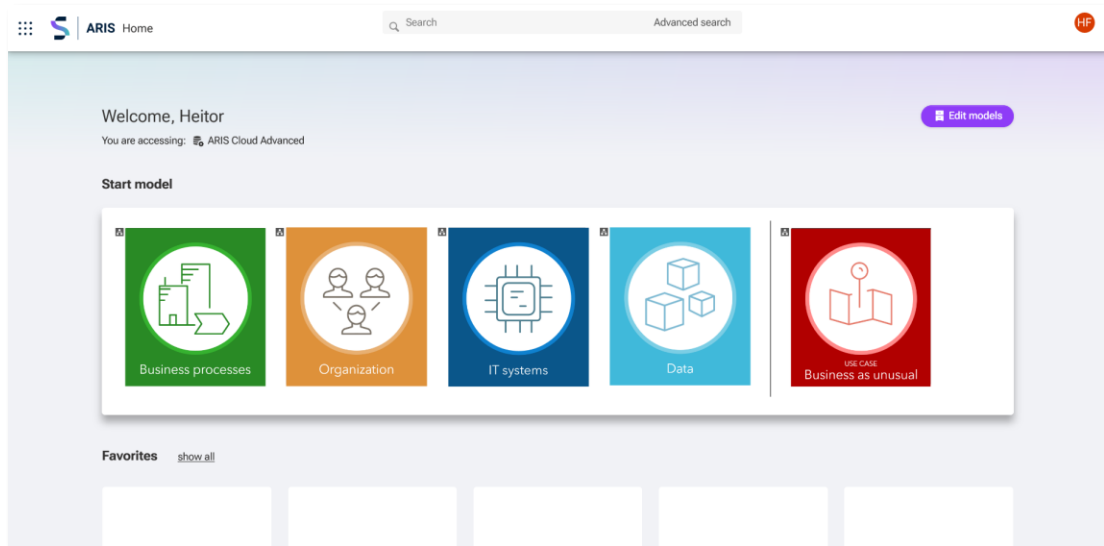

BUSINESS VALUE

- › Decreased TCO for UI customization
- › Intuitive usage through aligned UI
- › Foster adoption through individual UI

Simplified ARIS Advanced for New Customers

Start simple and quickly achieve value with ARIS Advanced

DESCRIPTION

- › Greater alignment and harmonization across ARIS BPA editions
- › Further steps towards Zero Java Footprint (no Architect)
- › Focus scope for easier start and clear differentiation against new ARIS Enterprise offering in shared cloud
- › Simplified license model: Designer, Viewer (no bundled licenses)

TARGET GROUP | USE CASE

- › New customers: small and medium enterprises
- › Companies starting small with their transformation journey

PREREQUISITES

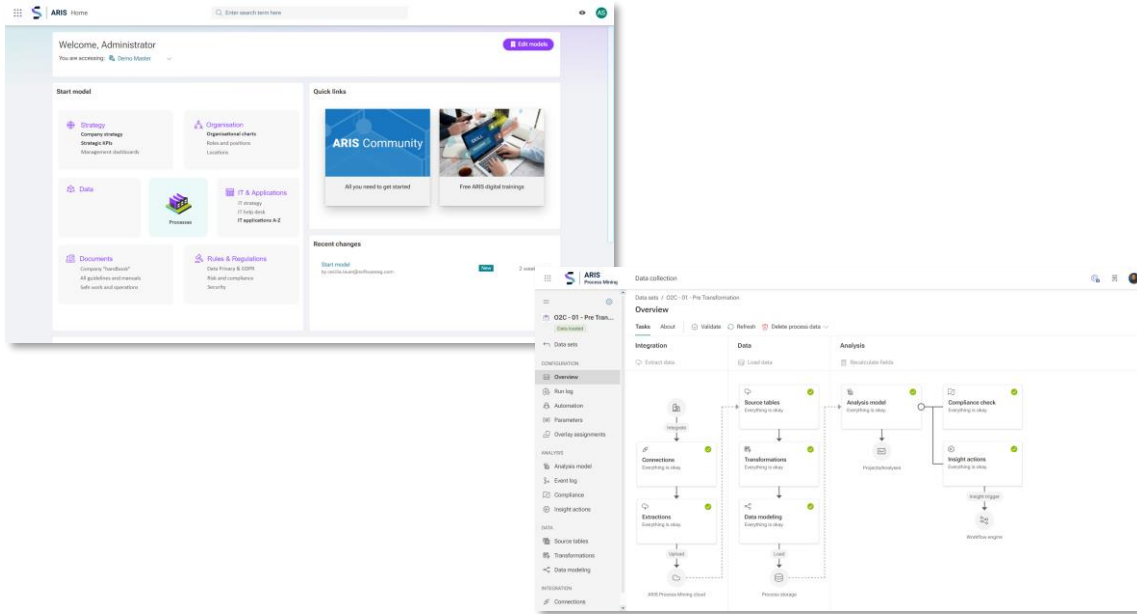

- › Editions: Advanced
- › Products: ARIS Advanced Designer, ARIS Advanced Viewer
- › Other: Focus scope of ARIS Advanced only applicable for new customers

BUSINESS VALUE

- › Reduced need for java-based clients
- › Faster time to value with a simpler product edition

Integrated ARIS Enterprise Offering in Public Cloud

ARIS Business Process Analysis and ARIS Process Mining – They are better together!

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS Base – Enterprise Public Cloud; ARIS Viewer – Enterprise Public Cloud; ARIS Viewer Pro – Enterprise Public Cloud; ARIS Designer – Enterprise Public Cloud; ARIS Admin – Enterprise Public Cloud
- › Other: In addition to the base, at least one Admin license is required

DESCRIPTION

- › One product covering both worlds – BPA and Mining
- › ARIS with integrated Process Mining Basic with the option to upgrade to ARIS Process Mining Enterprise
- › Simple licensing model: Viewer, Viewer PRO, Designer and Admin
- › Enhanced UI, additional standard capabilities
- › Automatically receive the latest ARIS updates

TARGET GROUP | USE CASE

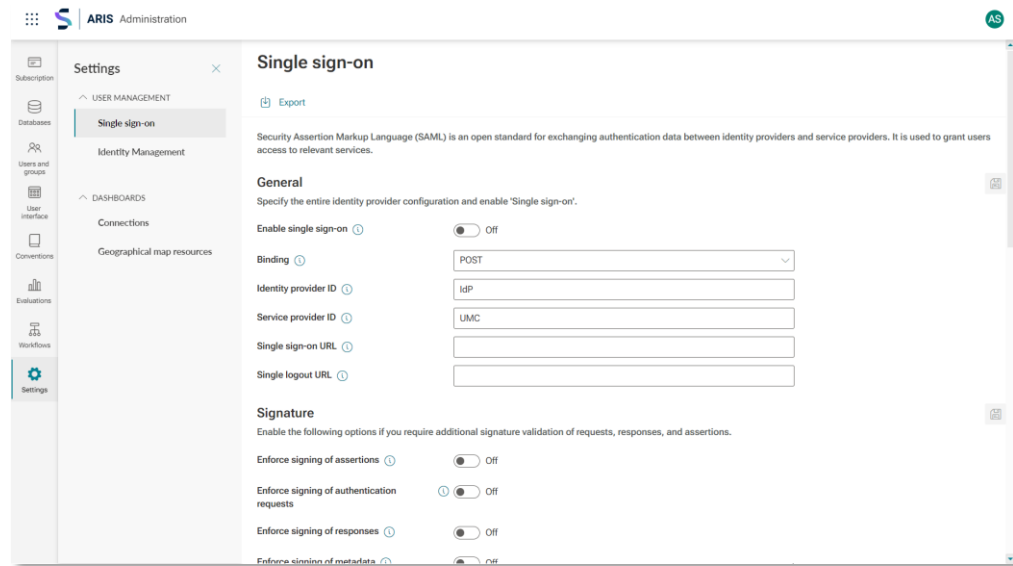

- › Companies starting their transformation journey
- › TCO aware customers

BUSINESS VALUE

- › Reduced TCO: easy configuration via the UI (WYSIWYG), automatically get the most recent ARIS version, self-service configuration instead of customization

Modernized Web Administration (Public Cloud)

Easily setup and administrate ARIS

DESCRIPTION

- › The administration is built on an aligned UI and offers a seamless experience across different components:
 - › Review subscription, manage users
 - › Set up conventions, manage databases and workflows
 - › Adapt the look and feel of the UI, manage publication

TARGET GROUP | USE CASE

- › Technical and functional administrators

PREREQUISITES

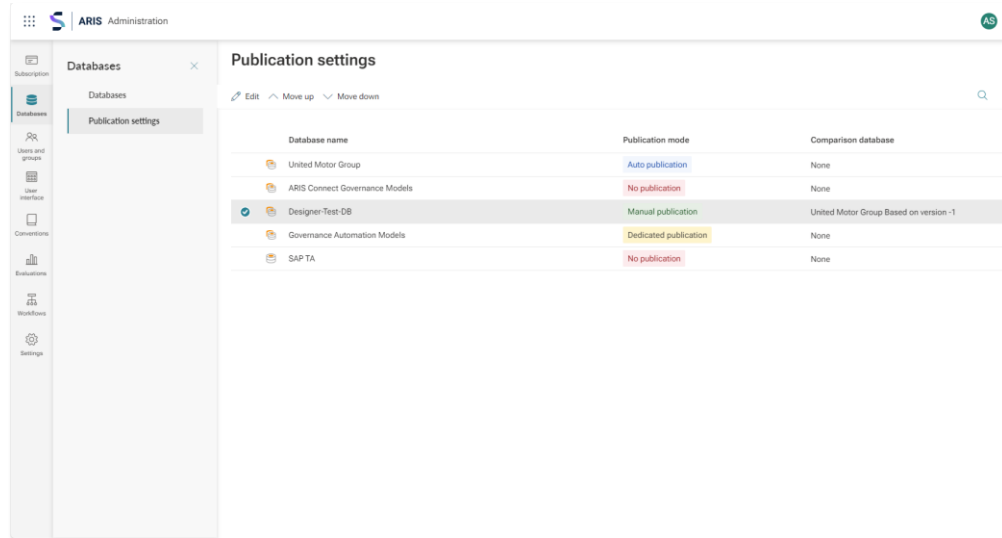

- › Editions: Enterprise (public cloud)
- › Products: ARIS Admin – Enterprise Public Cloud

BUSINESS VALUE

- › Decreased time to value
- › Tool adoption through intuitive UI

Extended Self-service Portal Configuration (Public Cloud)

Set up, manage, and administrate all repository and portal configuration

DESCRIPTION

- › Create and manage up to 5 different options for the look and feel of the portal's user interface (UI) and manage your subscription with capabilities to monitor usage and consumption of available resources
- › Create and manage your ARIS repositories (databases), modeling conventions, and the settings for publication of content

TARGET GROUP | USE CASE

- › Technical and Functional Product Owners, Business (Process) Analysts and Architects, as well as anyone who has administration or portal configuration rights for ARIS

PREREQUISITES

- › Editions: Enterprise (public cloud)
- › Products: ARIS Admin – Enterprise Public Cloud
- › Various additional function privileges needed

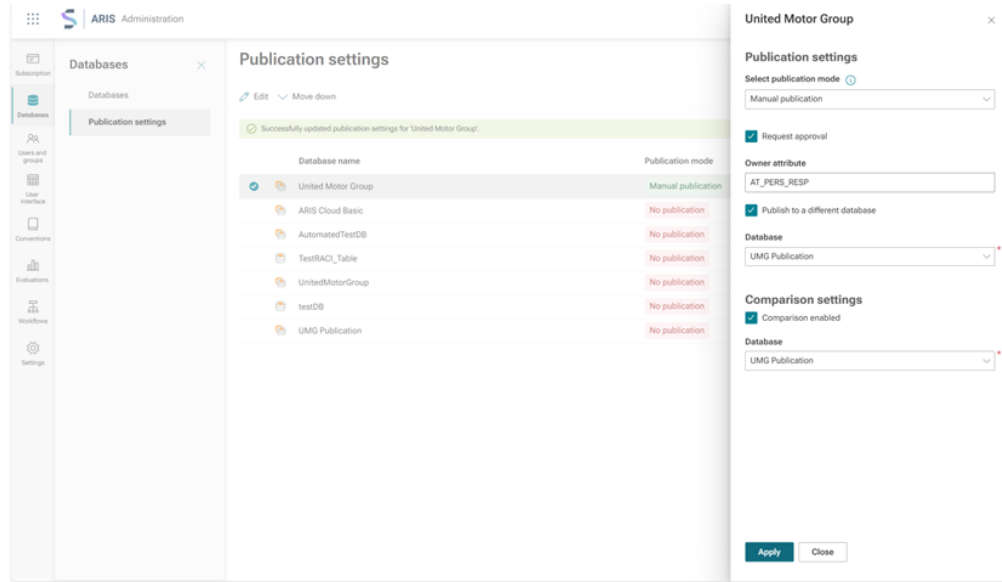

BUSINESS VALUE

- › Reduced efforts for time to project
- › Improved usability

Improved Model Approval Workflows (Public Cloud)¹

Use improved standard approval workflows to manage publication and lifecycle of contents

DESCRIPTION

- › Choose from improved standard publication settings that best suit your business and the lifecycle management of contents
- › Select between automated vs manual publication, if approval is needed or not, and if comparisons are allowed

TARGET GROUP | USE CASE

- › Business (Process) Analysts and Architects, content administrators, and anyone with an interest in managing the lifecycle of published contents

PREREQUISITES

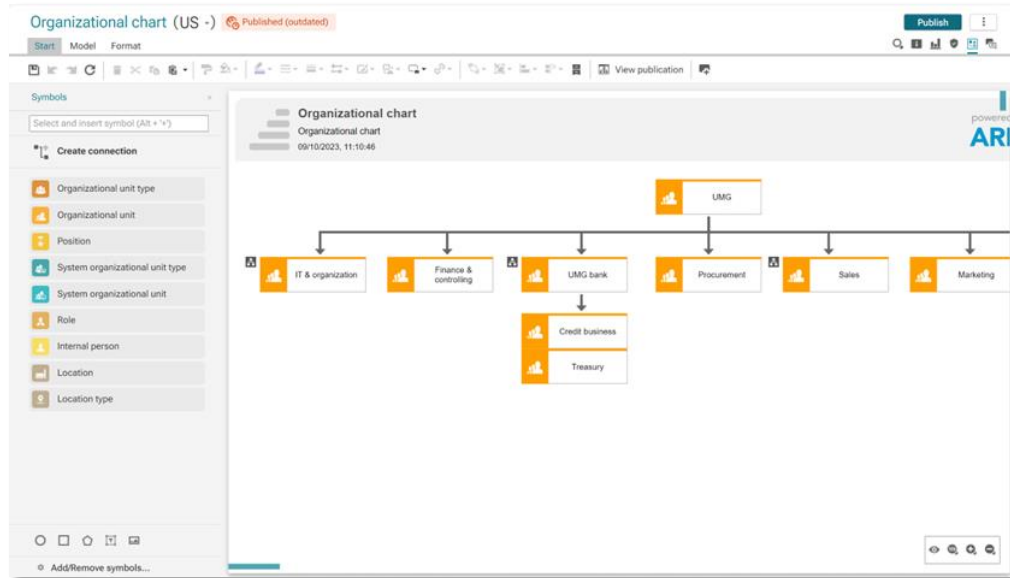

- › Editions: Enterprise (public cloud)
- › Products: ARIS Admin – Enterprise Public Cloud
- › Function privilege “Publishing administrator”

BUSINESS VALUE

- › Upgrade stable standard workflows speed up time to productivity
- › Lower TCO due to reduced overall efforts while providing flexibility to the user

Start Model Approval from Publish Button (Public Cloud)¹

Manually trigger publication to the portal (and approval)

DESCRIPTION

- › Users get immediate access to manually publish their updated content
- › Via predefined workflows, users may also request approval of the changes prior to publication
- › A preview and (request to) unpublish the displayed content is possible as well

TARGET GROUP | USE CASE

- › Business (Process) Analysts and Designers, and anyone creating new content

PREREQUISITES

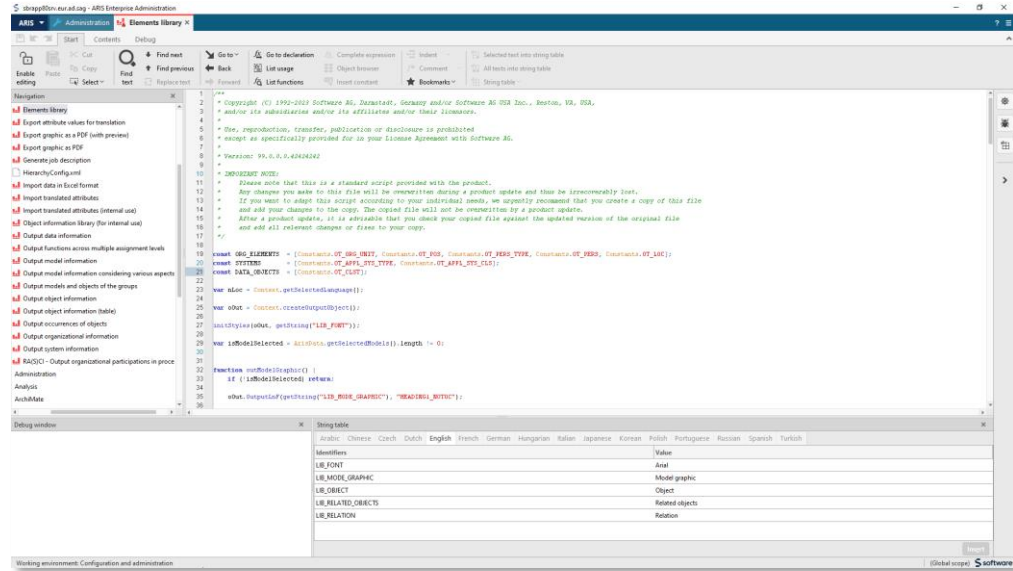

- › Editions: Advanced, Enterprise (public cloud)
- › Products: ARIS Advanced Designer, ARIS Designer – Enterprise Public Cloud

BUSINESS VALUE

- › Focus and access to the most relevant actions and a clean UI and user experience

Administration Client (Public Cloud)

Write reports, edit symbols, and retrieve locked objects

PREREQUISITES

- › Editions: Enterprise (public cloud)
- › Products: ARIS Admin – Enterprise Public Cloud

DESCRIPTION

- › Write, execute, and debug ARIS reports
- › Create and edit symbols
- › Retrieve and unlock locked items

TARGET GROUP | USE CASE

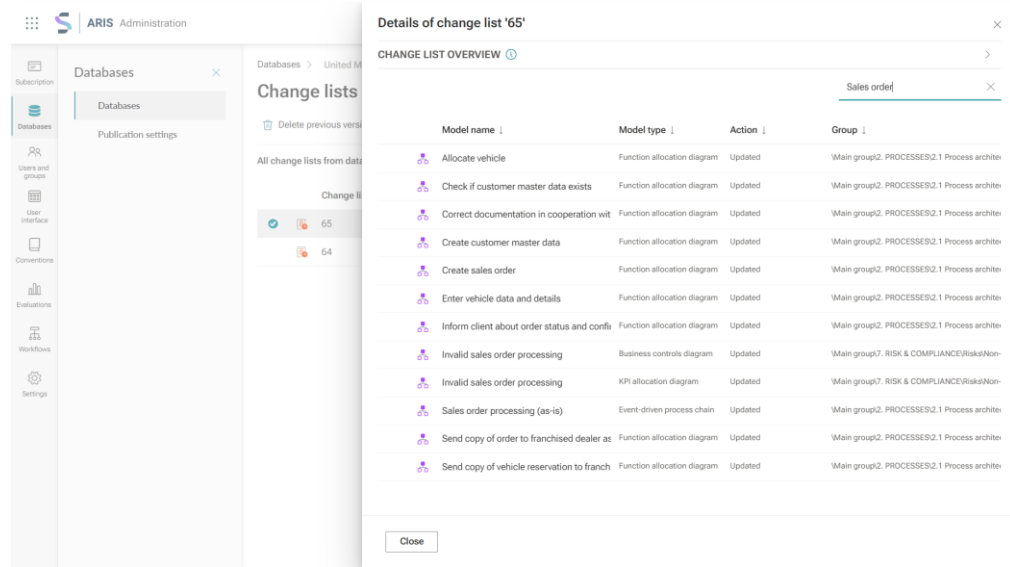

- › Report developer, repository administrator, database administrator, and Center of Excellence
- › Automate tasks in ARIS, create appealing custom reports based on the content maintained in ARIS
- › Maintain a high-quality repository

BUSINESS VALUE

- › Reduced efforts, high adoption through individualized content
- › Faster time to value

Change List Details in the Web

Investigate different versions of models in a versioned database

DESCRIPTION

- Easily investigate changes to models in a versioned database
- Filter for actions, model types, or model names in specific change lists

TARGET GROUP | USE CASE

- Database administrators, compliance managers
- Auditing and compliance, traceability and accountability, roll back versions

PREREQUISITES

- Editions: Advanced, Enterprise
- Products: ARIS Advanced Designer, ARIS Enterprise Admin, ARIS Admin – Enterprise Public Cloud
- Other: Change lists require a versioned database; ARIS Advanced Designer + Project Room Management

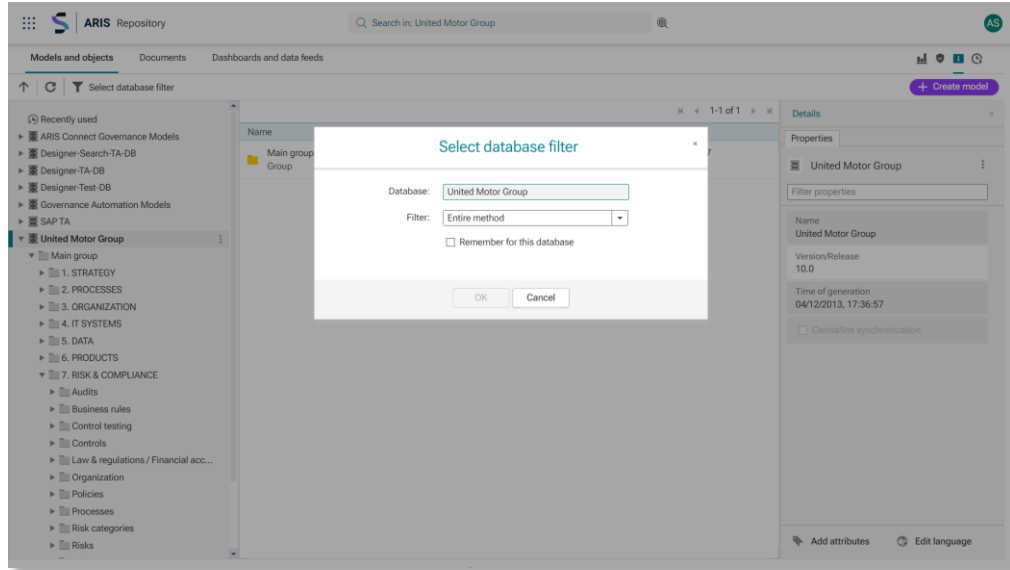

BUSINESS VALUE

- Reduced risks and costs related to opacity of applied changes
- Reduced risks and costs through non-compliance

Select Method Filter in the Web¹

Easily create and maintain ARIS content

DESCRIPTION

- › Reduce the visible content using predefined content filters
- › Investigate and compare content with different filters applied at the same time

TARGET GROUP | USE CASE

- › Designers, content creators, database administrators, Center of Excellence
- › Role-based content creation

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS Enterprise Designer, ARIS Enterprise Admin, ARIS Admin – Enterprise Public Cloud

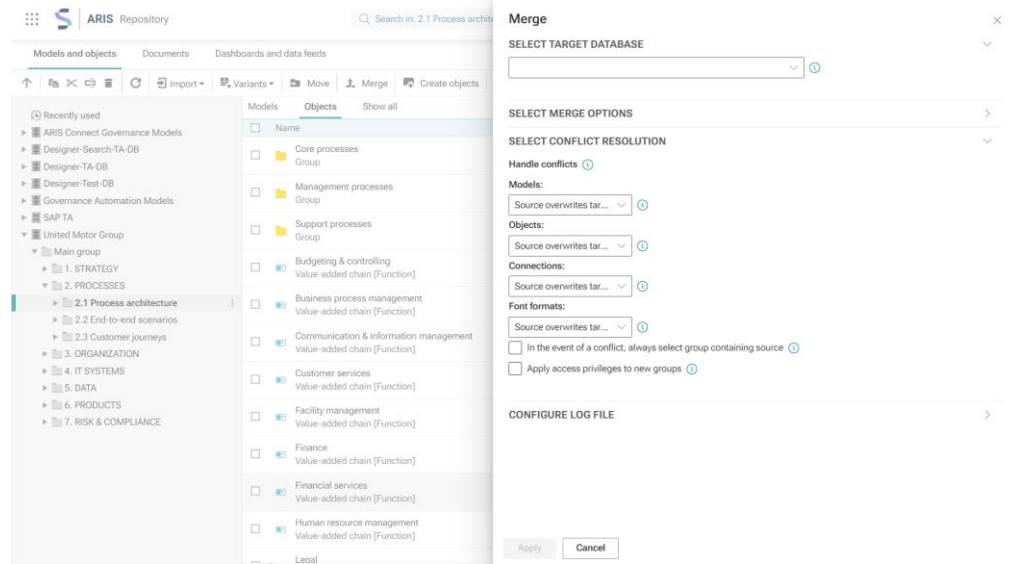

BUSINESS VALUE

- › Faster time to value through intuitive UI
- › Increased adoption through high-quality content

Merge Content in the Web¹

Easily transfer content between different databases

DESCRIPTION

- › ARIS Admins can merge content from database to the other in the web-based client
- › Merge can be also triggered in a copy and paste-like manner

TARGET GROUP | USE CASE

- › Administrators
- › Managing the repository, multi-database environments, staging environments

PREREQUISITES

- › Editions: Advanced, Enterprise
- › Products: ARIS Advanced Designer, ARIS Enterprise Admin
- › Other: Requires database privileges

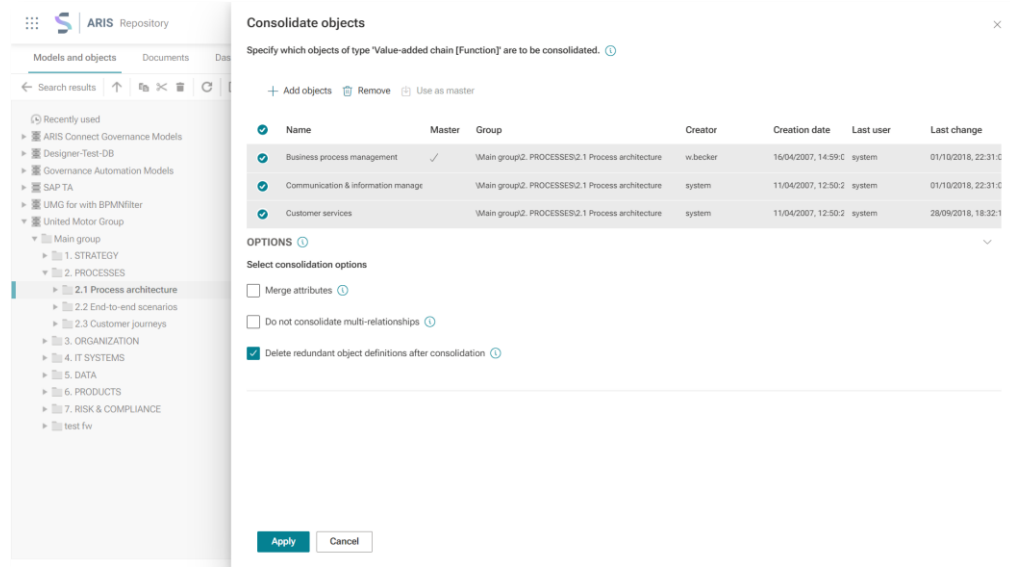

BUSINESS VALUE

- › No tool breaks, faster time to value

Consolidate Objects in the Web¹

Tackle information duplication in the single source of truth

DESCRIPTION

- ARIS Admins can consolidate objects in the browser-based client
- Consolidating objects resolves issues with managing duplicate information

TARGET GROUP | USE CASE

- Administrators, content owners, Center of Excellence
- Managing the repository, removing duplicates

PREREQUISITES

- Editions: Enterprise
- Products: ARIS Enterprise Admin

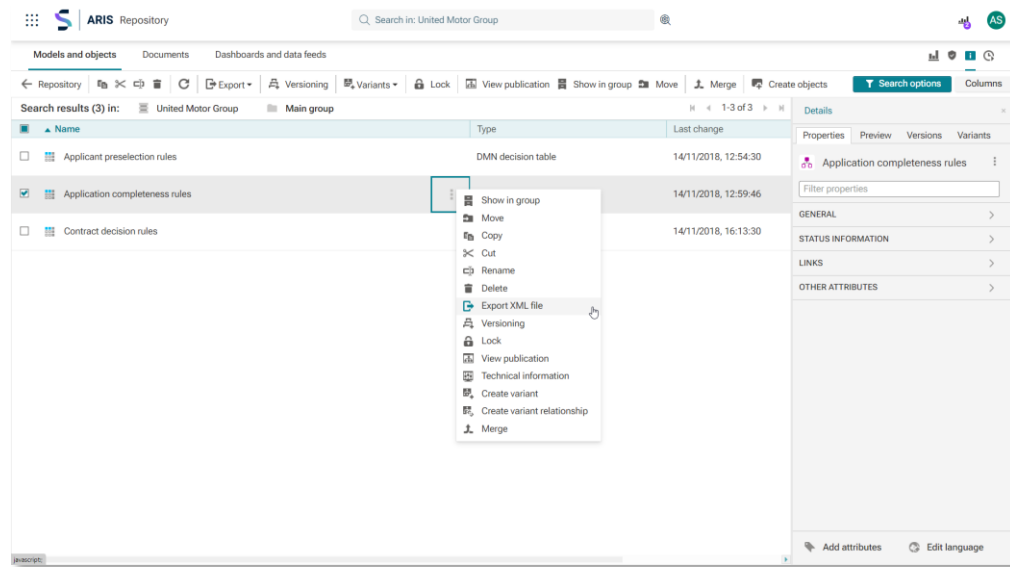

BUSINESS VALUE

- No tool breaks, faster time to value

Import/Export in the Web

Transfer data to a different ARIS environment

DESCRIPTION

- › Import and export DMNs in a DMN-compliant format (DMN 1.1, DMN 1.2 and DMN 1.3)
- › Export content of the repository as AML files
- › Import content stored in AML files

TARGET GROUP | USE CASE

- › Designers, content creators, database and repository administrators
- › Multi-staging environments, partner and 3rd party content and solutions

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS Enterprise Admin, ARIS Designer*
- › Other: Import requires according privileges for the database

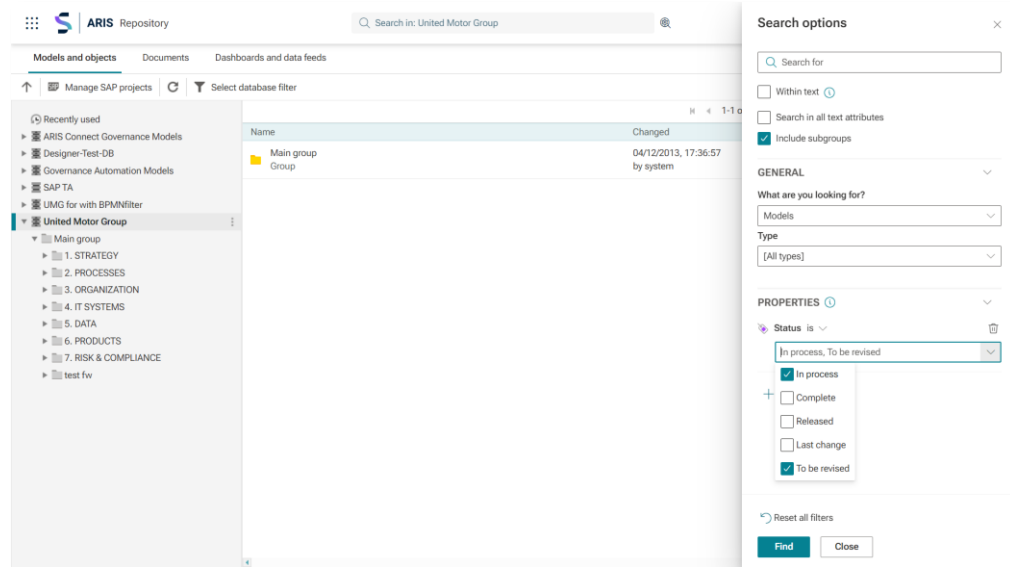

* No AML import /export available

BUSINESS VALUE

- › Decreased time to value (no tool breaks)

Repository Search Enhancements¹

Find relevant content

DESCRIPTION

- › Users can retrieve objects and models based on attributes that exhibit specific values (OR logic)
- › Retrieve results based on the GUID

TARGET GROUP | USE CASE

- › Designers, content creator, business analysts, repository administrators
- › Maintain and analyze the single source of truth

PREREQUISITES

- › Editions: Basic, Advanced, Enterprise
- › Products: ARIS Basic Designer, ARIS Advanced Designer, ARIS Enterprise Designer, ARIS Enterprise Admin
- › Other: Requires database read privileges

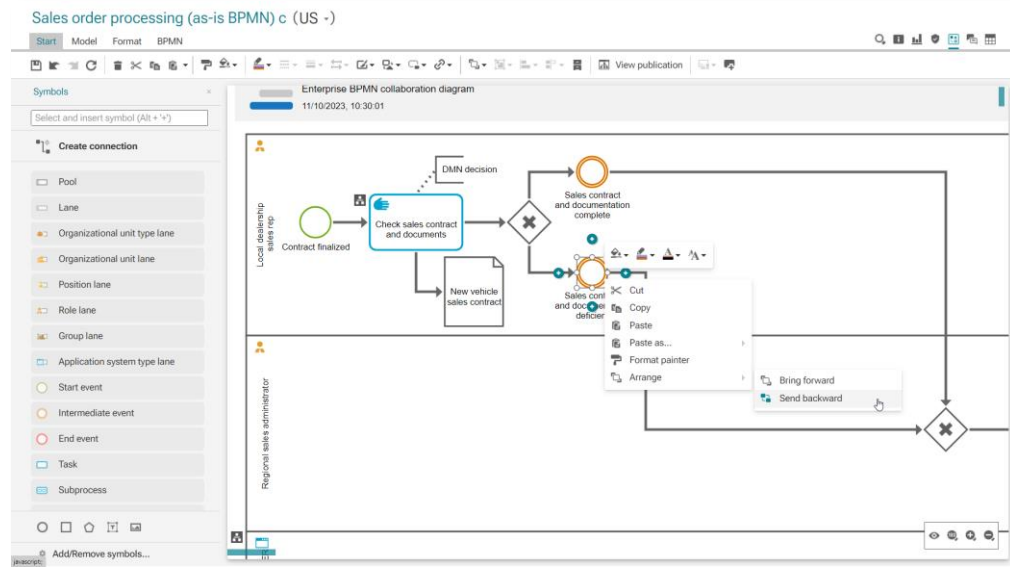

BUSINESS VALUE

- › Faster time to value

Right-click Context Menu

Easily create and maintain content

PREREQUISITES

- › Editions: Basic, Advanced, Enterprise
- › Products: ARIS Basic Designer, ARIS Advanced Designer, ARIS Enterprise Designer, ARIS Enterprise Admin

* not available in all editions

DESCRIPTION

- › The repository and design capabilities offer a right-click context menu
- › Right click options in repository: create new groups or models, delete, move, cut, paste, rename, export, unlock, versioning*, variants*, and merge*
- › Right click options in the Designer: cut, copy, paste, format painter, arrange, fill color, line color, line style, line weight, font color, font size

TARGET GROUP | USE CASE

- › Content creators, designers, database administrators, repository administrators
- › Maintaining repository, creating content

BUSINESS VALUE

- › Decreased time to value
- › Tool adoption through intuitive UI

DMN Decision Table in the Web

Standardize how decisions are made and integrate them into your processes

The screenshot shows a web-based interface for editing a Decision Table. The table has columns for 'Input', 'Output', and 'Annotations'. The 'Input' column is divided into 'Online Form' and 'Letter'. The 'Output' column is divided into 'Ranking' and 'Result description'. The table contains 7 rows of rules. Row 4 is highlighted in blue and shows a 'Comparison' dropdown menu.

	Input	Output	Annotations		
U	Online Form [0..30]	Letter "awesome", "average", "poor"	Curriculum Vitae True, False	Ranking [1..6]	Result description
1	>= 30	"awesome"	True	1	Top Candidate
2	[28..30]	"awesome"	True	2	Good Candidate
3	[25..28]	"average"	True	3	Invite to telephone interview if no other candidate is available
4	Comparison				
5	<=	"average"	True	4	Invite to telephone interview if no other candidate is available
6	>	"average"	False	5	Reject applicant
7	< 25	"poor"	False	6	Reject applicant

DESCRIPTION

- › Designers can create decision tables in a browser-based client
- › Define values and value ranges for inputs and outputs
- › Define expressions, use comparison and annotate rules

TARGET GROUP | USE CASE

- › Content creators, Business Analysts

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS Enterprise Designer, ARIS Enterprise Admin

BUSINESS VALUE

- › Standardize decisions, make them repeatable and transparent

Spreadsheet Modeler in the Web¹

Create data views, manage and augment ARIS content in a spreadsheet

Car loan application (as-is vs. to-be)

Basic information	
Name	Car loan application (as-is vs. to-be)
Description/Definition	This spreadsheet compares the as-is state c
Status-quo	To-be
Car loan application [Europe	
Settle old credit / send info letter to pre	Request supplementary documents
12,00 EUR	5,00 EUR
Forward vehicle registration certificate t	Check affordability
12,00 EUR	2,00 EUR
Check for third-party repayment	Inform client about rejection
1,00 EUR	5,00 EUR
Create letter of rejection	Inform client about rejection
10,00 EUR	5,00 EUR
Send letter of rejection / customer docu	Create car loan application
10,00 EUR	8,00 EUR
Send repayment letter to third-party ba	Check completeness of loan file
14,00 EUR	5,00 EUR
Archive credit request data	Analyze the file for decision
10,00 EUR	3,00 EUR
Check availability of vehicle registration	Generate new offer
30,00 EUR	6,00 EUR
Print welcome letter	Initiate client contact
4,00 EUR	30,00 EUR
Archive financing documents	Enter initial offer
10,00 EUR	8,00 EUR
Initiate credit approval and check custo	Disburse the loan in car dealer's accou
40,00 EUR	2,50 EUR
Initiate credit approval	Inform client about rejection
20,00 EUR	5,00 EUR
Check internal increase	Check credit bureau
2,00 EUR	3,00 EUR
Allocate customer / account number	Perform scoring
2,00 EUR	2,00 EUR
Send welcome letter to customer	Inform client about rejection
6,00 EUR	5,00 EUR
Remit commission payment	Check KD criteria
20,00 EUR	1,00 EUR
Enter credit amount	Calculated average total costs (all functions):
2,00 EUR	5,97 EUR
Archive application data in system	
2,00 EUR	
Send financing documents to archive	
15,00 EUR	
Execute credit decision	
3,00 EUR	
Calculated average total costs (all functions):	
71,25 EUR	

DESCRIPTION

- Create spreadsheet models to generate individual data views on ARIS content
- Edit attributes and apply helpful functions like aggregations to attribute values

TARGET GROUP | USE CASE

- Content creators, Center of Excellence, Business Analysts
- Maintain high-quality content, process analysis, and process optimization

PREREQUISITES

- Editions: Enterprise
- Products: ARIS Enterprise Designer, ARIS Enterprise Admin

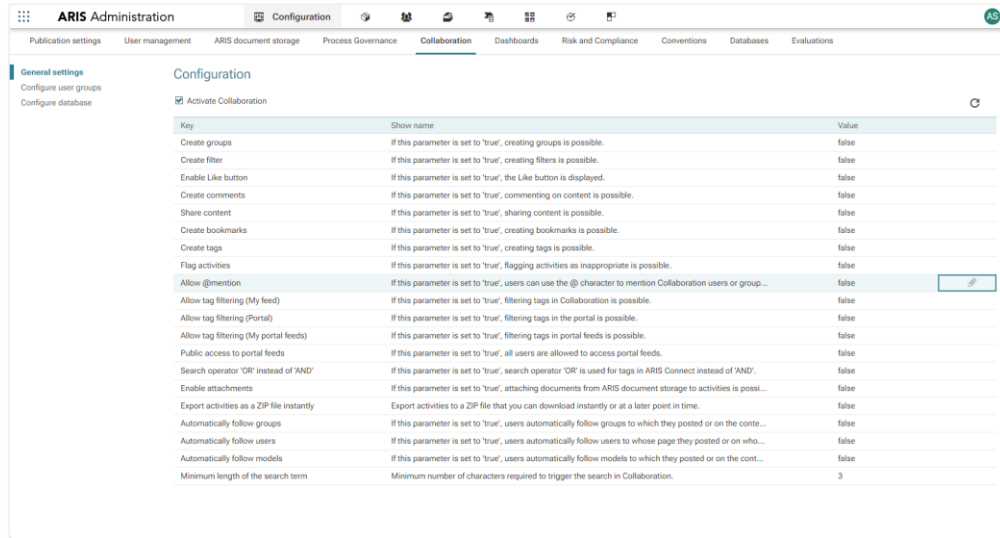

BUSINESS VALUE

- Decreased costs/increased revenue due to optimized processes

Various Improvements

Set up enhanced privacy settings, evolve with ARIS accessibility, and de-support of legacy functionality

Key	Show name	Value
Activate Collaboration		<input checked="" type="checkbox"/>
Create groups	If this parameter is set to 'true', creating groups is possible.	false
Create filter	If this parameter is set to 'true', creating filters is possible.	false
Enable Like button	If this parameter is set to 'true', the Like button is displayed.	false
Create comments	If this parameter is set to 'true', commenting on content is possible.	false
Share content	If this parameter is set to 'true', sharing content is possible.	false
Create bookmarks	If this parameter is set to 'true', creating bookmarks is possible.	false
Create tags	If this parameter is set to 'true', creating tags is possible.	false
Flag activities	If this parameter is set to 'true', flagging activities as inappropriate is possible.	false
Allow @mention	If this parameter is set to 'true', users can use the @ character to mention Collaboration users or group...	false
Allow tag filtering (My feed)	If this parameter is set to 'true', filtering tags in Collaboration is possible.	false
Allow tag filtering (Portal)	If this parameter is set to 'true', filtering tags in the portal is possible.	false
Allow tag filtering (My portal feeds)	If this parameter is set to 'true', filtering tags in portal feeds is possible.	false
Public access to portal feeds	If this parameter is set to 'true', all users are allowed to access portal feeds.	false
Search operator 'OR' instead of 'AND'	If this parameter is set to 'true', search operator 'OR' is used for tags in ARIS Connect instead of 'AND'.	false
Enable attachments	If this parameter is set to 'true', attaching documents from ARIS document storage to activities is possible.	false
Export activities as a ZIP file instantly	Export activities to a ZIP file that you can download instantly or at a later point in time.	false
Automatically follow groups	If this parameter is set to 'true', users automatically follow groups to which they posted or on the content...	false
Automatically follow users	If this parameter is set to 'true', users automatically follow users to whose page they posted or on who...	false
Automatically follow models	If this parameter is set to 'true', users automatically follow models to which they posted or on the content...	false
Minimum length of the search term	Minimum number of characters required to trigger the search in Collaboration.	3

DESCRIPTION

- › For advanced privacy settings, Admin is now able to activate or deactivate the mentioning of users in the ARIS Collaboration
- › A description about accessibility and browser screen reader combinations was added to the documentation to better fulfill Guideline (EN) 301 549
- › Legacy SAP SolMan 7.1 support and html export were removed

TARGET GROUP | USE CASE

- › Despite administrative set up, it targets to give more privacy to all ARIS users who can be mentioned in collaboration threads
- › Accessibility is meant to support the needs of different target groups and aims at adhering to accessibility laws and international standards

PREREQUISITES

- › Option to set up privacy settings is available in dedicated and on-premise ARIS Enterprise deployments for ARIS Enterprise Admin with function privilege "Collaboration Administrator"
- › ARIS accessibility is an overall ARIS product standard and available in all ARIS editions

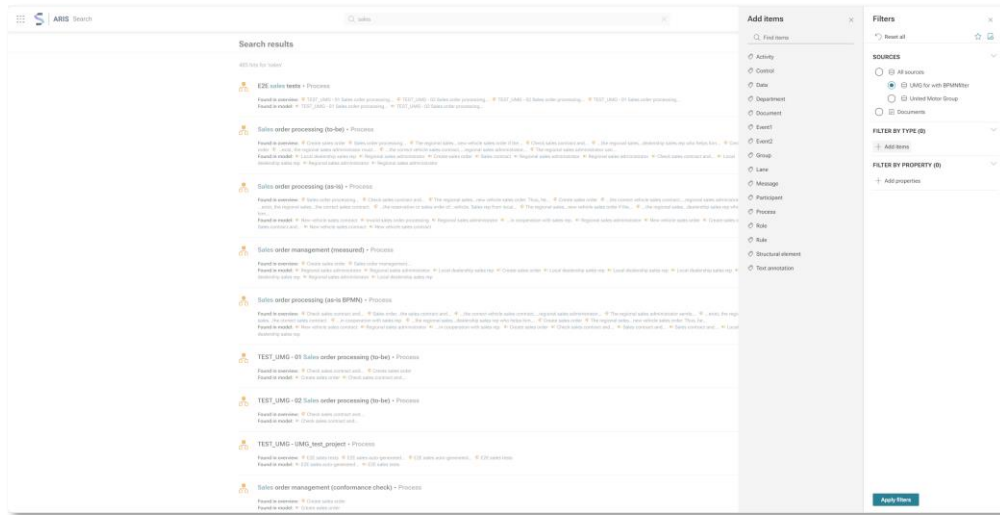

BUSINESS VALUE

- › Ensure a more secure and tailored environment for collaboration
- › Accessibility integrates every type of user and increases the reach

New Portal Search Takes Database Filter into Account

Reduced set of filter criteria for improved end user adoption

DESCRIPTION

- If a default filter is assigned to the database, it is taken into account by the portal search filter
- Only items and properties that are allowed in the ARIS method filter show up as filter criteria and thereby reduce the complexity and options

TARGET GROUP | USE CASE

- Any Viewer of the portal or consumers browsing and searching for specific contents in the publication

PREREQUISITES

- Editions: Enterprise
- Products: ARIS Enterprise Viewer; ARIS Viewer – Enterprise Public Cloud
- Other: New Portal Search has been activated and added to existing portal configurations

BUSINESS VALUE

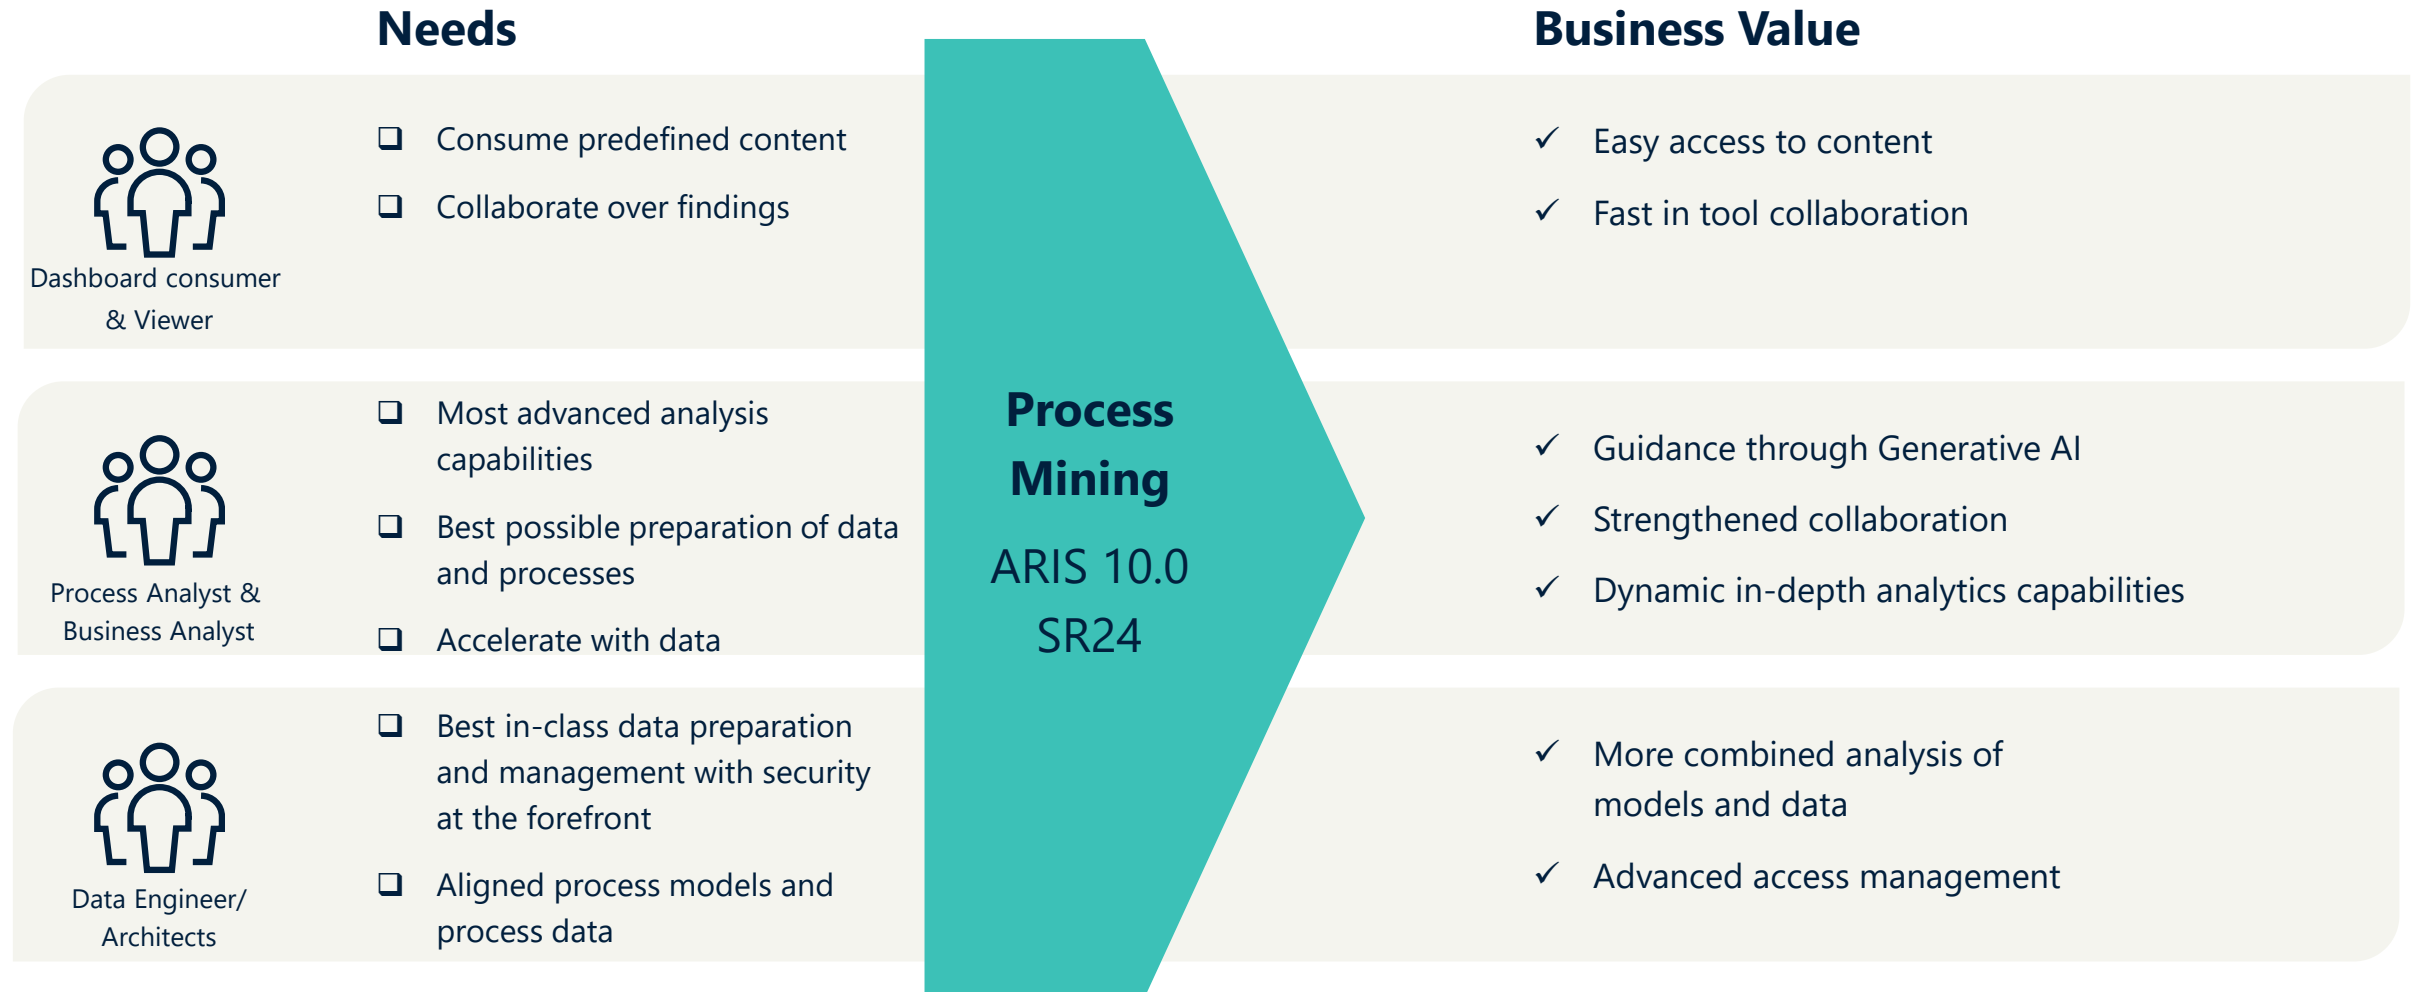

- Improves and simplifies user experience

Process Mining

SR24

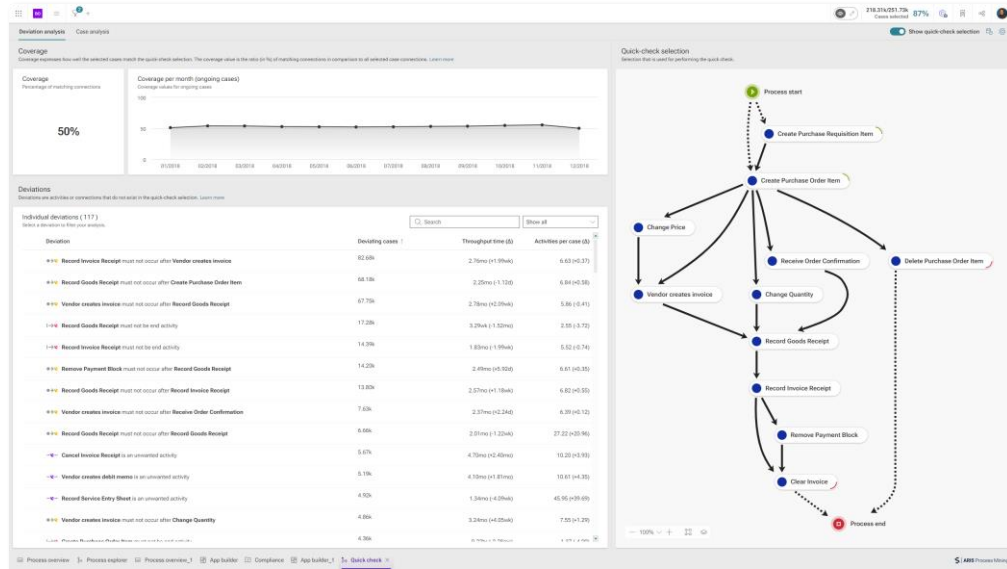

Who Will Benefit Most from the New ARIS Release?

Put yourself into the shoes of the following personas working with ARIS

Dynamic Process Quick Checks in ARIS Process Mining¹

Expand process compliance functionality by checking selected connections with our baseline

DESCRIPTION

- Select connections from the Process Explorer and use them as a baseline for your check against other cases
- Get a list of deviations and compare the behavior of cases

TARGET GROUP | USE CASE

- Process Mining Analyst and Engineers who want to dynamically analyze the process behavior and measure different cases

PREREQUISITES

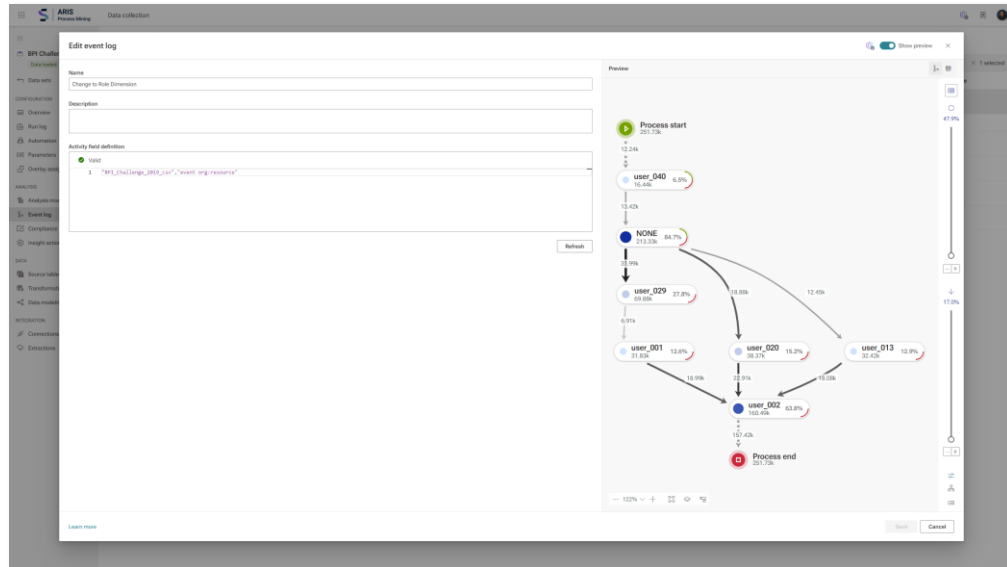

- Editions: Basic, Advanced, Enterprise
- Products: ARIS Process Mining

BUSINESS VALUE

- Drive seamless and dynamic analyzes of process data
- Get fast information on how selected cases perform in contrast to others

Variable Event Log Definitions¹

Change the dimension of your process mining log and redefine your activities

DESCRIPTION

- › Define a new log definition and change the dimension for the activities
- › Remap activities to other activities or exclude them from the analysis
- › Merge activities to a higher level of detail to better fit the need

TARGET GROUP | USE CASE

- › Process Mining Analyst and Engineers in charge of adapting the data to the need of a Business Analyst or the right level of granularity to measure the processes

PREREQUISITES

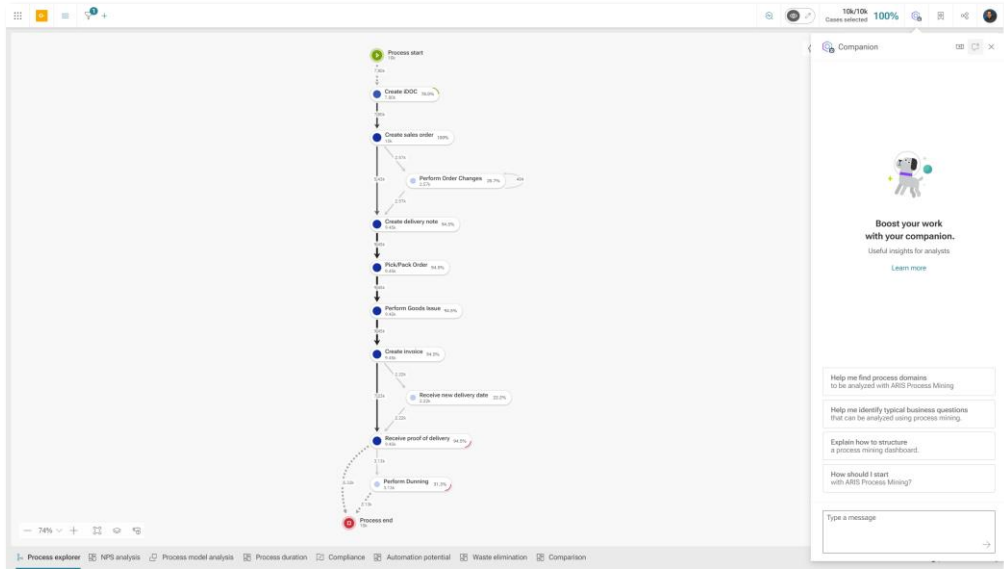

- › Editions: Advanced, Enterprise
- › Products: ARIS Process Mining

BUSINESS VALUE

- › Adapt the process data to the need of the analysis
- › Drive in-depth analysis and adapt the data to your processes
- › Maintain several definitions and switch if needed

A Companion for ARIS Process Mining

Get information from the chatbot on each page without the need to change applications

DESCRIPTION

- › Use the capabilities of OpenAI with the built in chatbot in ARIS Process Mining
- › Ask questions for help and ideate with the AI to find the best solution for your project

TARGET GROUP | USE CASE

- › Process Mining Analyst and Engineers who want to use AI to help in the daily work

PREREQUISITES

- › Editions: Basic, Advanced, Enterprise
- › Products: ARIS Process Mining
- › OpenAI or Azure OpenAI API key

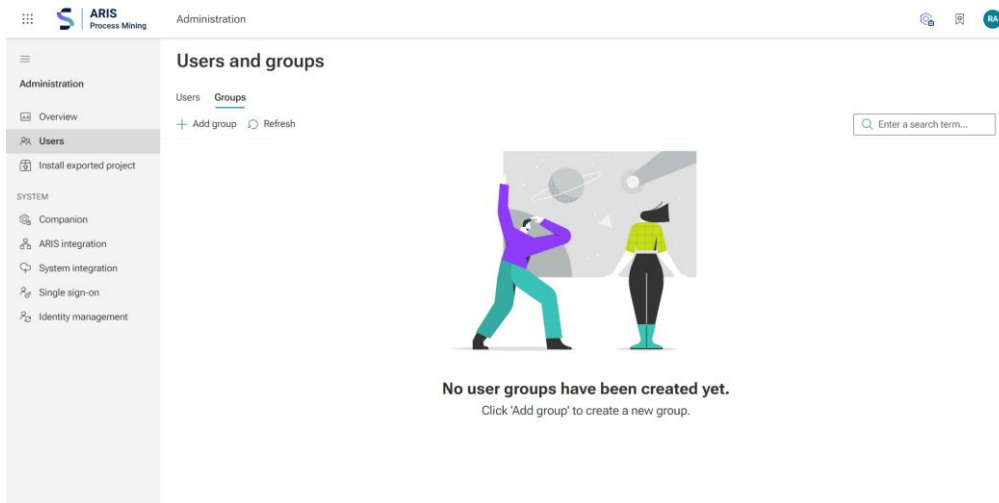

BUSINESS VALUE

- › Direct integration of an AI-based chatbot in ARIS Process Mining
- › Get information from the chatbot on each page without the need to change applications

Introducing User Groups

Access control made easier with user groups

DESCRIPTION

- › Its now possible to assign rights to both user groups and individual users
- › Provides full control over access management
- › Possibility of granular controls like data level access

TARGET GROUP | USE CASE

- › ARIS Process Mining Engineers and Analysts configuring permissions to the users of the tenant

PREREQUISITES

- › Editions: Basic, Advanced, Enterprise
- › Products: ARIS Process Mining

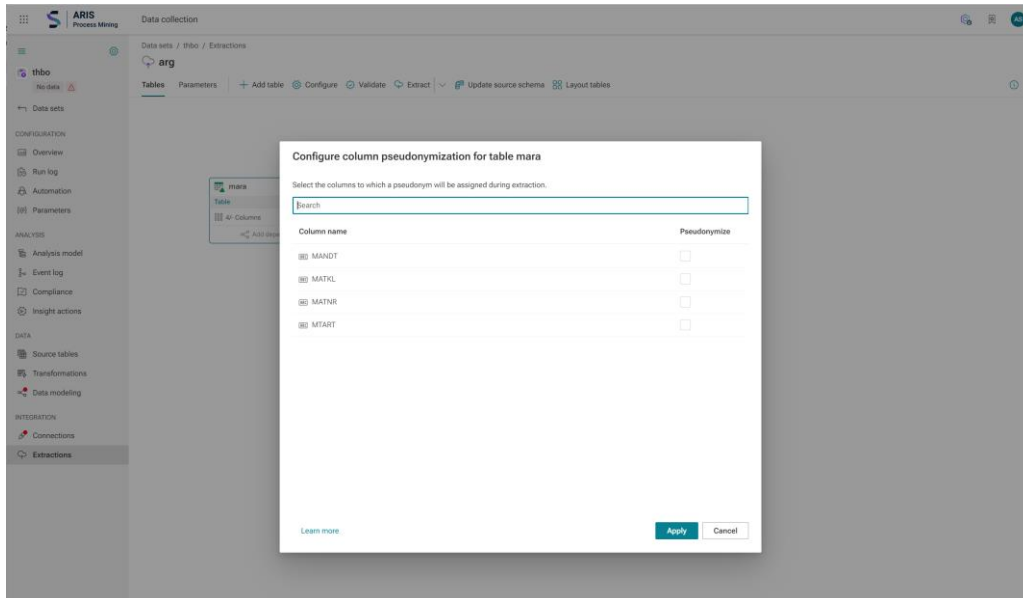

BUSINESS VALUE

- › Making access control for process mining simpler and efficient

Data Pseudonymization during Extraction of Source Tables

Import sensitive data without compromising on security

DESCRIPTION

- › Users can pseudonymize their data before it even enters ARIS Process Mining
- › Protect valuable information and maintain confidentiality easily with a single click

TARGET GROUP | USE CASE

- › ARIS Process Mining Engineers extracting sensitive information.

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS Process Mining

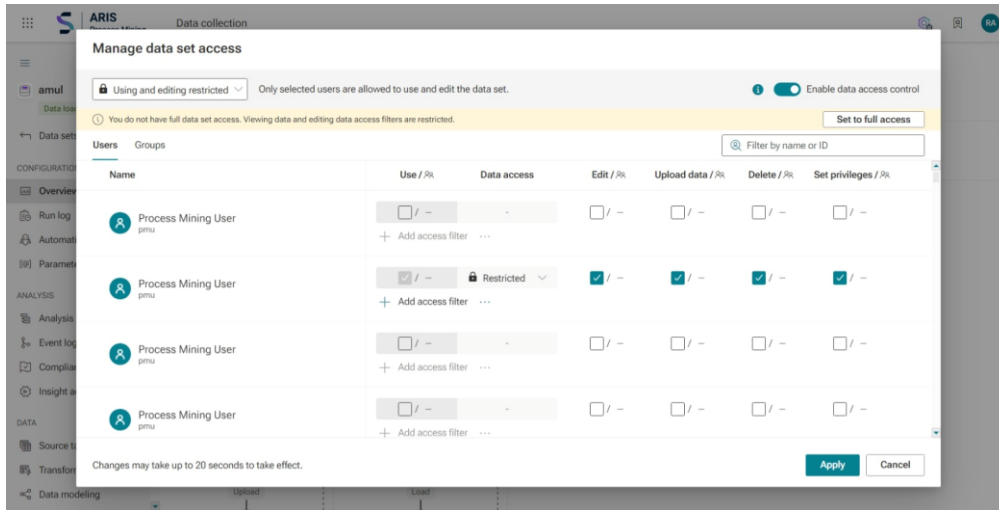

BUSINESS VALUE

- › Sensitive data can now be imported into ARIS Process Mining without compromising security

Access Rights at Data Level

Ensure right data is accessible by right users

DESCRIPTION

- Precisely define access rights at the data level, aligning perfectly with the unique needs and authorizations of users
- Filter by region, time frame, or any other criteria

TARGET GROUP | USE CASE

- ARIS Process Mining Engineers and Analysts providing right data access to right set of users

PREREQUISITES

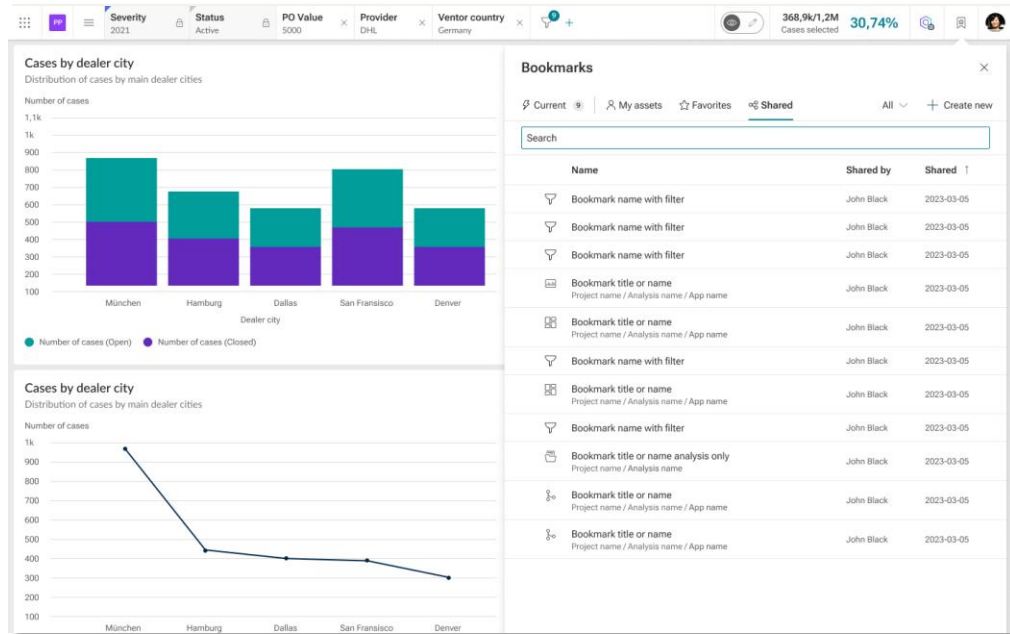

- Editions: Enterprise
- Products: ARIS Process Mining

BUSINESS VALUE

- Ensure right data is available for right users to have better control over rollout process

Share Findings via Bookmarks

Share insights to create a collaborative process mining experience

DESCRIPTION

- › Enable users to easily share their valuable process mining findings with others by creating bookmarks
- › Share insights, best practices, and discoveries with colleagues and peers, fostering a collaborative environment that drives innovation and efficiency

TARGET GROUP | USE CASE

- › ARIS Process Mining Analysts sharing insights without losing the context

PREREQUISITES

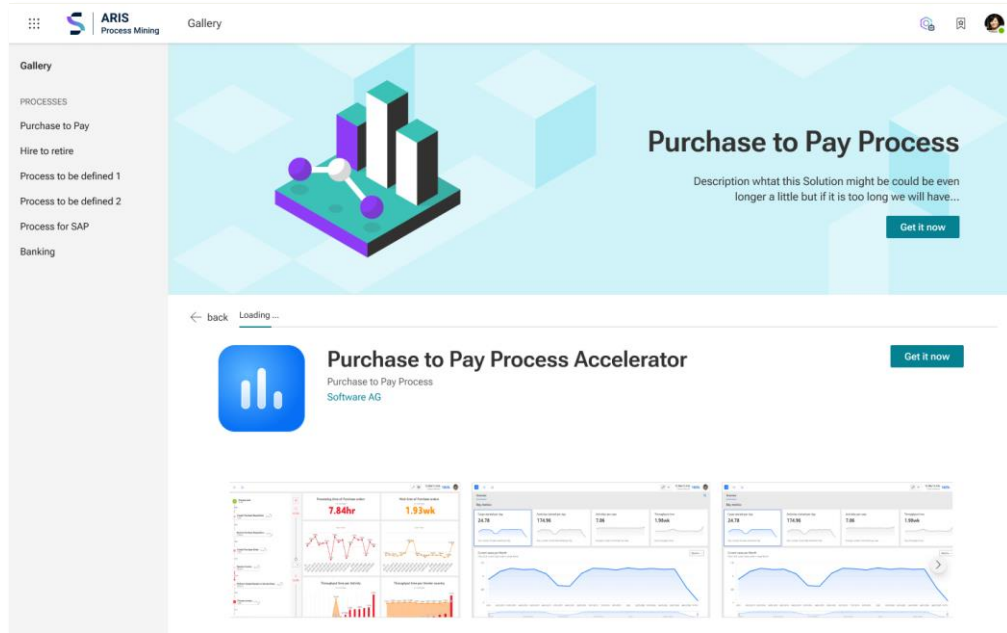

- › Editions: Basic, Advanced, Enterprise
- › Products: ARIS Process Mining

BUSINESS VALUE

- › Achieve the key capability of collaboration between different stakeholders without losing the context to achieve operational excellence

Gallery 2.0 - Adding Data to the Installation

Beloved accelerators now come with data

DESCRIPTION

- › Accelerators now come with data in it to instantly deliver value
- › Users do not need to worry about the lack to access to demo source systems

TARGET GROUP | USE CASE

- › ARIS Process Mining Engineers and Analysts looking to jump start the Process Mining journey

PREREQUISITES

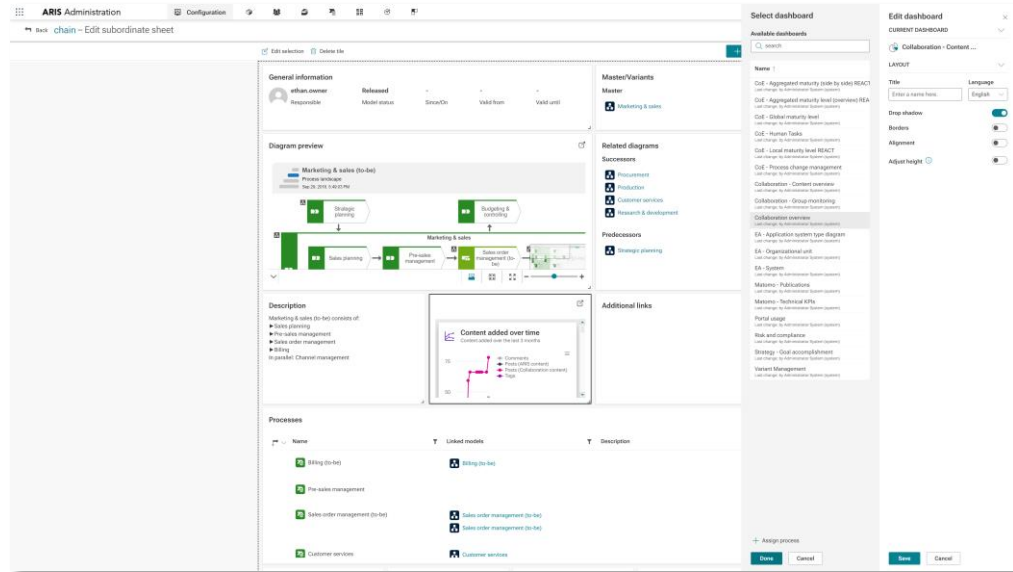

- › Editions: Enterprise, Advanced
- › Products: ARIS Process Mining

BUSINESS VALUE

- › Accelerate time to value with predefined and standardized accelerators for numerous processes

Add Dashboards via WYSIWYG Editor

Embed ARIS Process Mining or any other business dashboards into the published contents of the portal

DESCRIPTION

- › Use the WYSIWYG editor and UX enhanced assignment options to enhance content overviews by adding single charts or entire dashboards
- › Create separate dashboard tabs and embed ARIS Process Mining dashboards and regular dashboards

TARGET GROUP | USE CASE

- › Business (Process) Analysts, portal administrators, dashboard creators, or Process Mining Analysts who wish to make data even more accessible and actionable in the context of the entire Business Architecture

PREREQUISITES

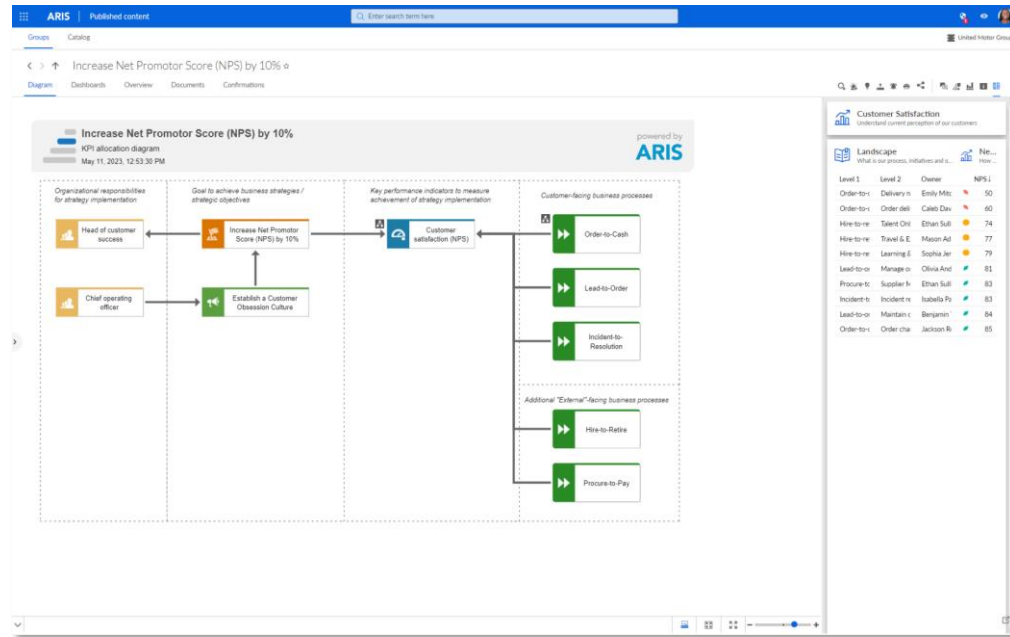

- › Editions: Enterprise
- › Products: ARIS Enterprise Admin
- › Function privilege: "Publishing administrator"

BUSINESS VALUE

- › Make more data-driven business decisions and see them and their effects in the context that they happen
- › Adds more versatile and user-friendly views on data

Dashboarding for Viewer License

Everyone ARIS user has access to analytics

DESCRIPTION

- › Every ARIS user can now have access to analytics with required access control
- › Viewer pro and higher can now start creating dashboards

TARGET GROUP | USE CASE

- › All ARIS users looking for analytics

PREREQUISITES

- › Editions: ARIS Enterprise and Enterprise shared
- › Products: ARIS Dashboarding

BUSINESS VALUE

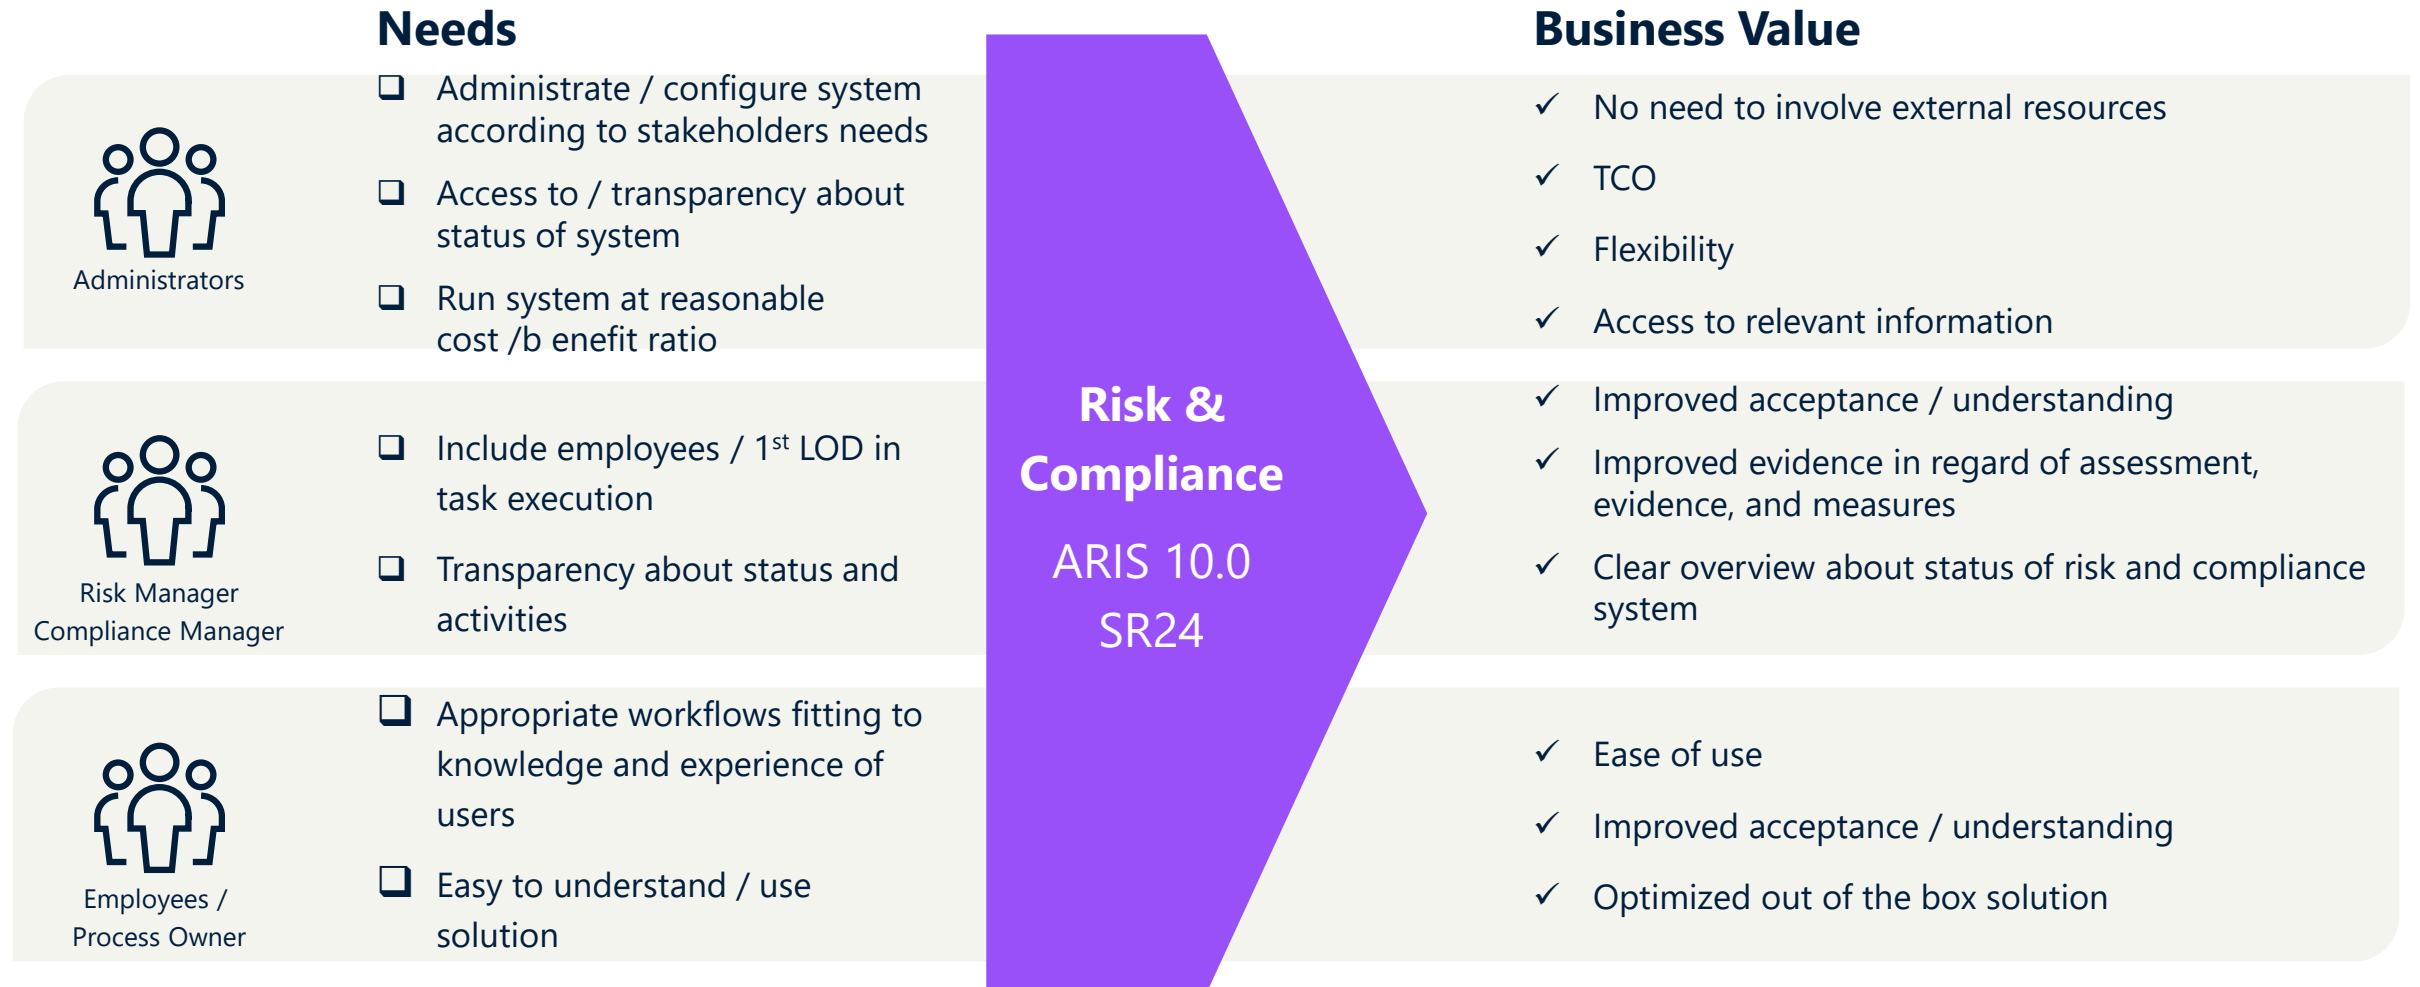

- › Roll out necessary analytics to every user to gain higher transparency

Risk & Compliance

SR24

Who Will Benefit Most from the New ARIS Release?

Put yourself into the shoes of the following personas working with ARIS

Risk and Compliance: Self-service-configuration

Rename forms and lists according companies' conventions / needs (Part 1)

The screenshot shows the ARIS Administration interface. On the left, there is a navigation menu with categories like GENERAL, WORKFLOW MANAGEMENT, CONTENT CONFIGURATION, and ADMINISTRATION. The main area displays a table of form attributes under the 'Forms' section. The table has columns for Name and Identifier. The 'Immediate measure' row is selected. A dialog box titled 'Immediate measure - Edit form attribute details' is open, showing fields for Name, Language, Label, and Visibility. The 'Show' radio button is selected. There are 'Save' and 'Cancel' buttons at the bottom of the dialog.

DESCRIPTION

- › Configure form attributes, list columns, and list filters via UI
- › Rename in different languages and hiding
- › Reset changes to default values

TARGET GROUP | USE CASE

- › Administrators that will adapt wording in risk and compliance context according companies needs

PREREQUISITES

- › Editions: Enterprise
- › Products: Risk and Compliance

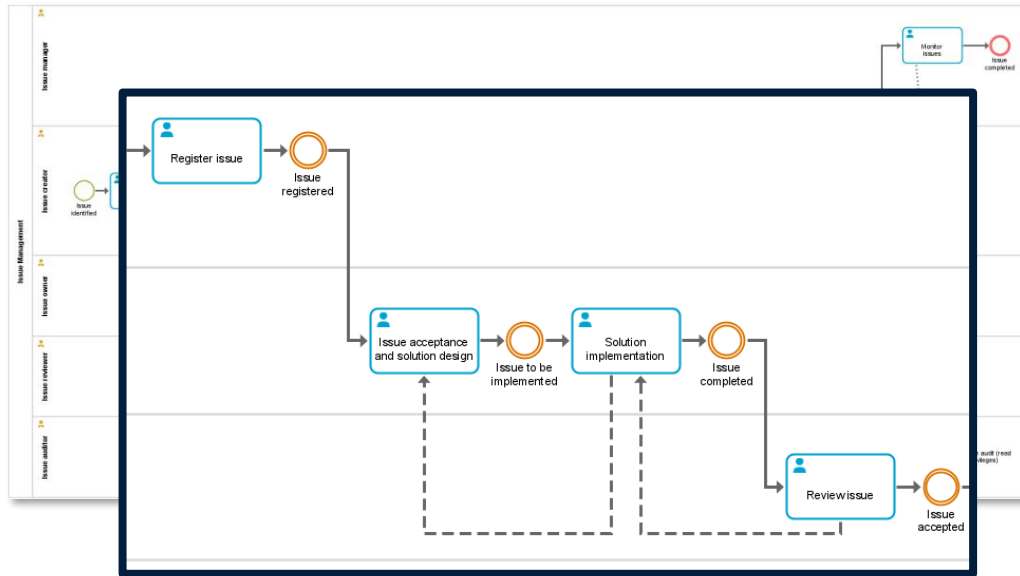

BUSINESS VALUE

- › Improved understanding / acceptance by end user
- › Lower TCO – less efforts for external customizing / configuration

Enhanced Issue Management

Register issues as first step in standard workflow

PREREQUISITES

- › Editions: Enterprise
- › Products: Risk and Compliance

DESCRIPTION

- › Issue creator who doesn't know how to solve the problem and who will be responsible to work on that issue; an additional role is to be included in the workflow (issue manager) who will take on the task to assign responsible people and define how to solve
- › The procedure for adding further relevant objects to an issue via the Portal has been improved

TARGET GROUP | USE CASE

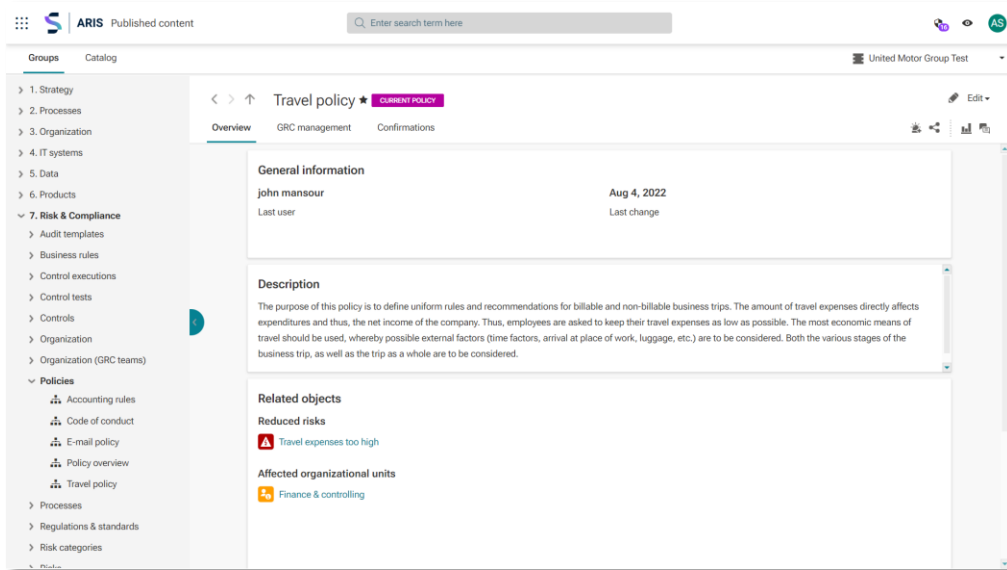

- › Employees (1st line of defense) reporting issues to address a problem not knowing how to solve it or what measures to take
- › Issue responsible who now have more options to address further participants (e. g. separate solution design and solution implementation)

BUSINESS VALUE

- › Ease of use
- › Clear and more detailed overview about status of issues
- › Appropriate separation of tasks

Various Improvements

Improved resilience and better information for administrators, ease of use for portal consumer

PREREQUISITES

- › Editions: Enterprise
- › Products: Risk and Compliance

DESCRIPTION

- › Improved handling of database connection outages (resilience)
- › Improved fallback capabilities to messages
- › Users looking at a policy item in ARIS Portal shall see if there is a valid (current) policy-roll-out

TARGET GROUP | USE CASE

- › Administrator who need access to relevant information during / after outages
- › Employees / portal consumers facilitated with attention attracting icon to notice status and access current policies

BUSINESS VALUE

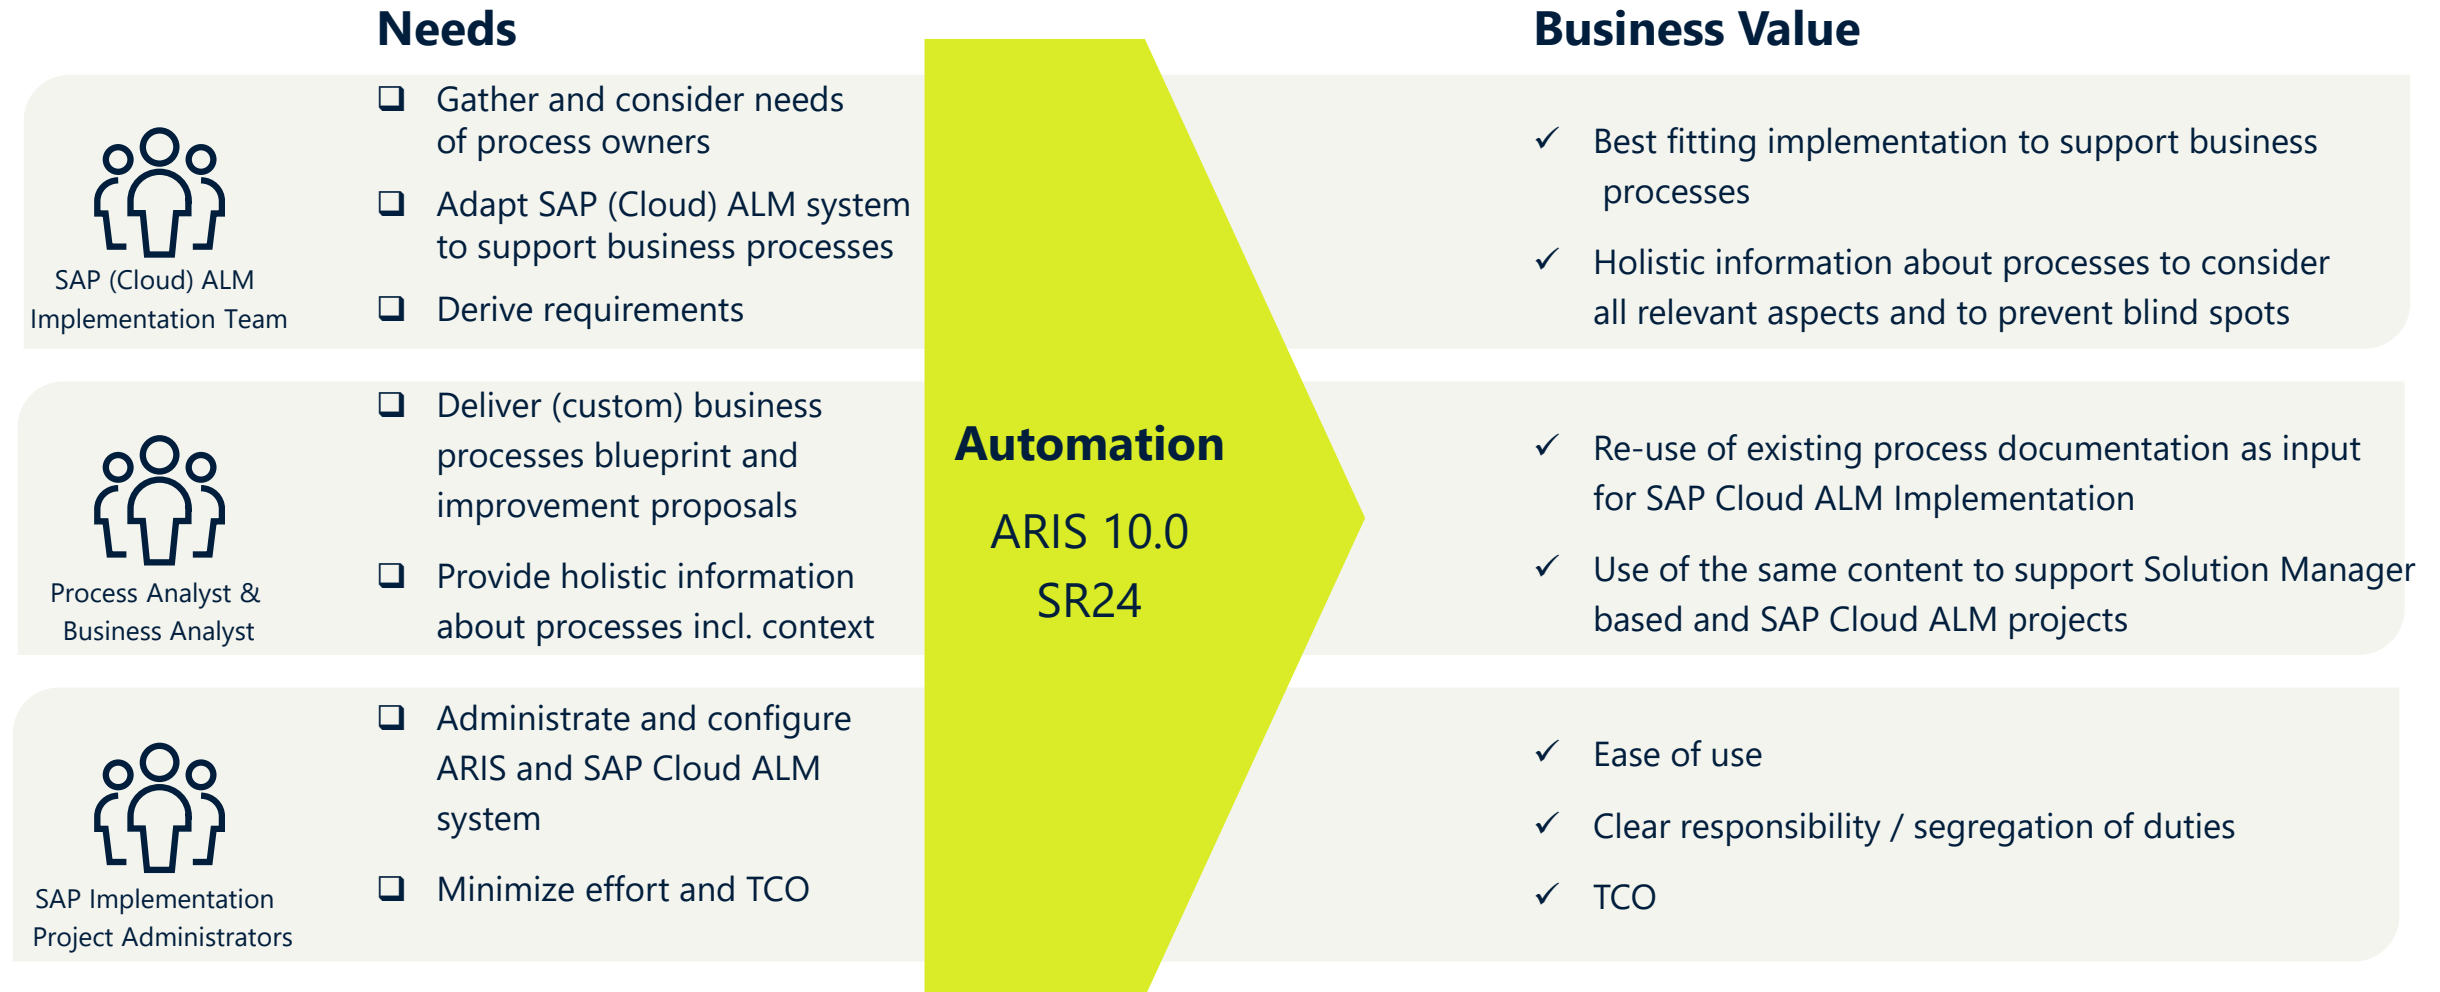

- › Better access to relevant information about status of system
- › Condensed and optimized information for administrator
- › Ease of use

Automation

SR24

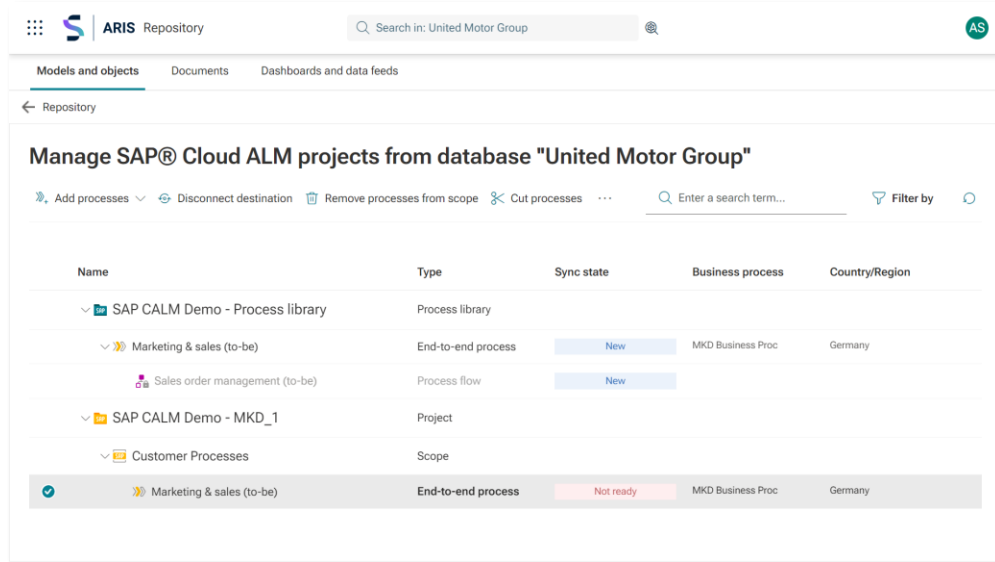

Who Will Benefit Most from the New ARIS Release?

Put yourself into the shoes of the following personas working with ARIS

Syncing ARIS Process Information with SAP Cloud ALM

Use your custom processes as input for your SAP Cloud ALM Implementation

Name	Type	Sync state	Business process	Country/Region
▼ SAP CALM Demo - Process library	Process library			
▼ Marketing & sales (to-be)	End-to-end process	New	MKD Business Proc	Germany
▼ Sales order management (to-be)	Process flow	New		
▼ SAP CALM Demo - MKD_1	Project			
▼ Customer Processes	Scope			
▼ Marketing & sales (to-be)	End-to-end process	Not ready	MKD Business Proc	Germany

DESCRIPTION

- › Use business processes documented and maintained in ARIS as custom solution value flows and solution process flow in SAP Cloud ALM
- › Use and access ARIS portal content as accelerator in SAP Cloud ALM
- › Preview ARIS model graphic in SAP Cloud ALM

TARGET GROUP | USE CASE

- › SAP Cloud ALM Implementation teams that want to use documented process content as (holistic) input within their projects
- › Business process analysts that want their process information to be used

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS for SAP Solutions
- › Other: SAP Cloud ALM

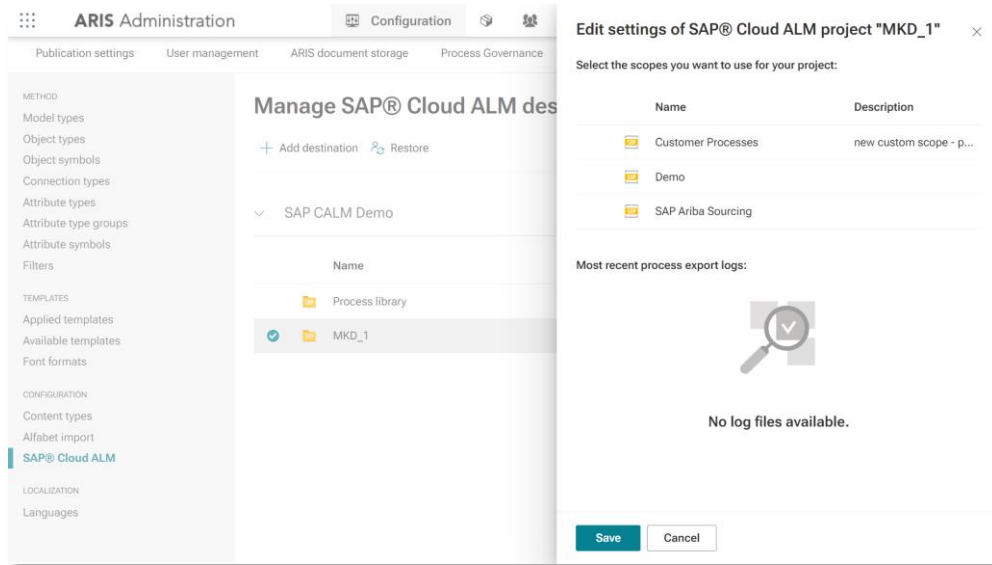

BUSINESS VALUE

- › Business processes used as assets / accelerators help IT and business to better understand each other
- › Common basis to communicate and derive requirements
- › Re-use of existing business process documentation and knowledge within multiple ALM projects

Enable Synch ARIS - SAP Cloud ALM: Project Administration

Easily maintain settings for SAP Cloud ALM destination and projects

DESCRIPTION

- › Define and edit relevant settings for connection to SAP Cloud ALM destinations
- › Access most recent export log information
- › Select correct scopes for each SAP Cloud ALM project connected to ARIS

TARGET GROUP | USE CASE

- › SAP Cloud ALM project administrator

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS for SAP Solutions
- › Other: SAP Cloud ALM

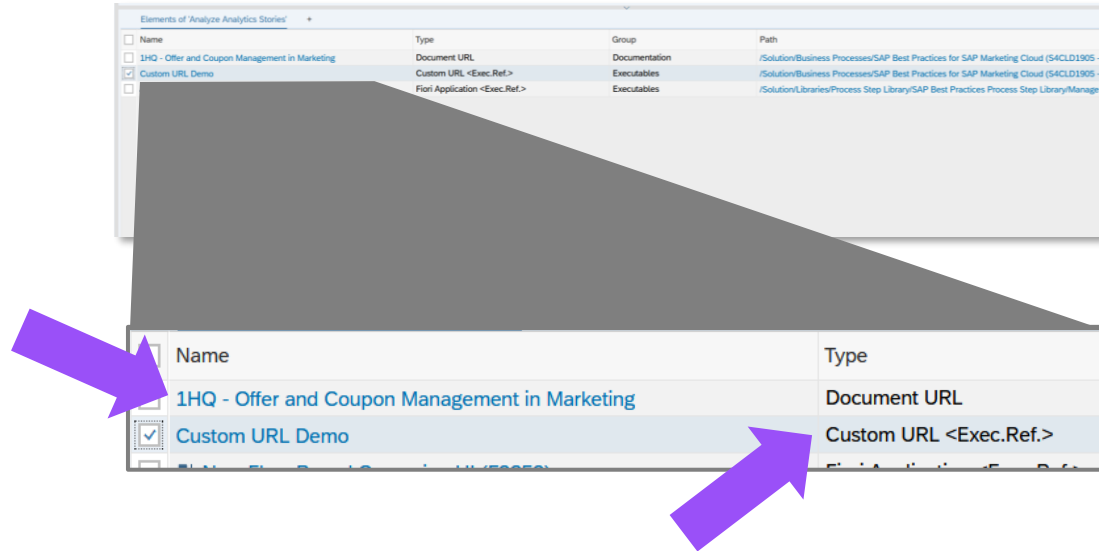

BUSINESS VALUE

- › Central maintaining (adding, editing, refreshing, restoring, and deleting) of SAP Cloud ALM destinations for a restricted user group helps prevent errors / misuse
- › Reduced TCO, ease of use

ARIS for SAP Solutions - Smaller Improvements¹

Improved UI / completed set of options

DESCRIPTION

- › Custom URL as additional executable type is made available in ARIS modeling
- › Name of the ARIS process is shown in document link for scenario or process

TARGET GROUP | USE CASE

- › SAP project team member working with ARIS and SAP Solution Manager

PREREQUISITES

- › Editions: Enterprise
- › Products: ARIS for SAP Solutions

BUSINESS VALUE

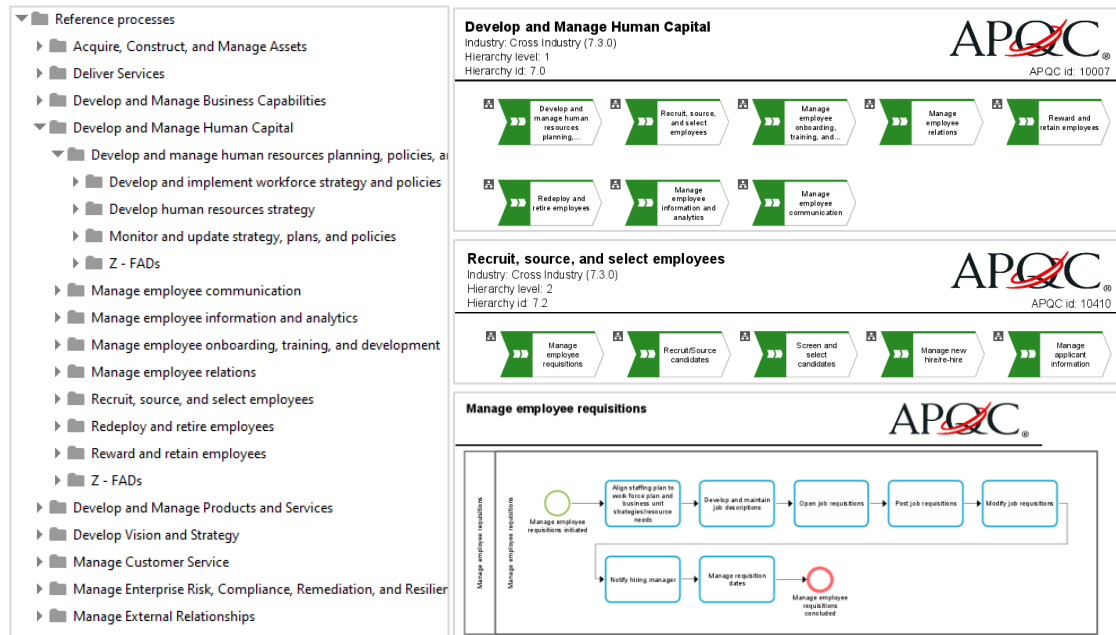

- › New, executable type completes options considered in synchronization
- › Ease of use

Suite

SR24

Process Classification Framework (PCF) by APQC

ARIS Content Package

DESCRIPTION

- This ARIS Content Packages comes as ready-to-use ARIS database or as ARIS import script
- It provides the complete PCF content of APQC latest version (7.3/7.2.1)
- This reference processes are structured in 4 levels (VACD, VACD, Enterprise-BPMN, + FAD) as well as a suitable group structure

TARGET GROUP | USE CASE

- BPM organization / Center of Excellence (ARIS Core team)
- Setup new business process repository or alignment of existing repository to industry standard

PREREQUISITES

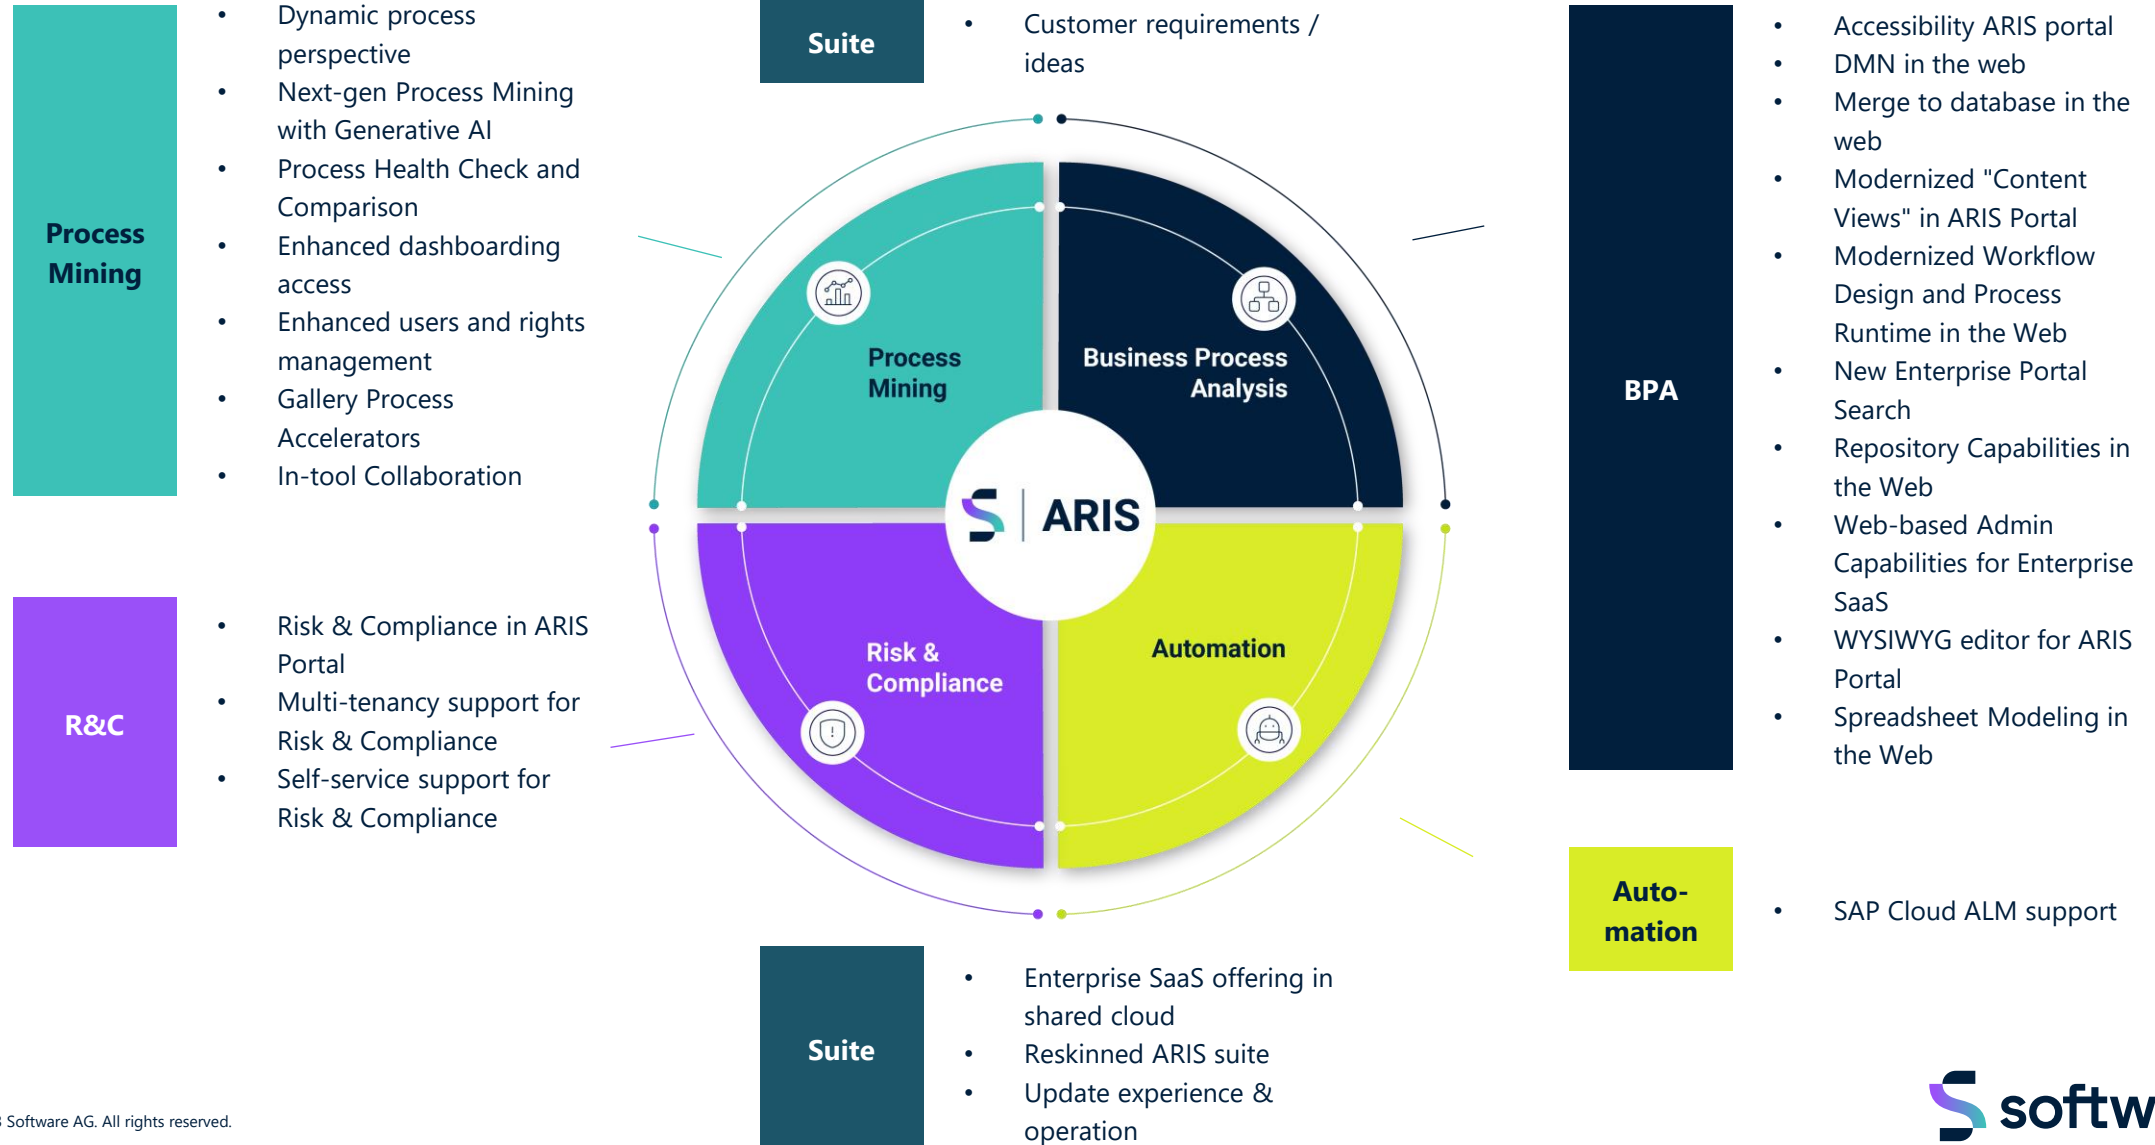

- Editions: ARIS Advanced or ARIS Enterprise

BUSINESS VALUE

- Predefined: Reduce the creation effort of a new business process repository
- Best-Practice: Align the repository structure/taxonomy on APQC's "quasi standard"
- Linked Benchmarks: Get references to the metrics of APQC's "Open Standards Benchmarking" database with KPI definitions and values

The New ARIS Release Moves ARIS to the Next Level

High-level priorities of ARIS 10.0 SR24

Where to Find Us

Follow us in LinkedIn

The screenshot shows the ARIS LinkedIn profile. At the top, it says "Ride the Wave to Success with the Leader of Process Intelligence!". Below that, the ARIS logo is displayed. The profile description states: "#1 Market-Leading Process Intelligence Suite | business process analysis, process mining, automation, risk & compliance". It also mentions "Software Development | Darmstadt, Hessen | 232 followers". There are buttons for "Following", "Visit website", and "More". The "About" section describes ARIS as supporting organizations in their transformation and operational excellence initiatives. The "Page posts" section shows two recent posts: "The Art of Automating Processes without 'Dying in the Attempt'" and "Let's celebrate!".

ARIS Community

The screenshot shows the ARIS Community website. The header includes the "software" logo and "ARIS Community" text, along with "Join now" and "Sign in" buttons. The main navigation bar lists: Home, ARIS BPM Blog, ARIS Basic, ARIS Process Mining, Forums, Know-how, Education, Partners, ARIS Hub, and Try ARIS for free!. The main content area features a "Welcome to ARIS Community!" banner. Below this, there's a section for "Now available: ARIS Education Package for Faculties Multi-user private cloud" with a "Get started now!" button. To the right, there's a "Featured Achievement" section for "Answermachine" and a "Recent Unlocks" section. A "Leaderboard" section lists top contributors like Zuzana Baloghova (109 Points) and milagros-Janett milagros (27 Points). The "Featured posts" section includes: "ARIS Community as a key knowledge platform. Find out why!", "ARIS Customer Survey 2023 - Take the survey now and win prizes!", and "ARIS 10 SR 22 is available-Find all news here".

ARIS News

The screenshot shows the ARIS News website. The header features the "software" logo and "ARIS NEWS" text. The main content area is divided into several sections: "Make your business soar with process optimization" with a "Learn more" button; "Discover the latest trends in process optimization WEBINAR" with a "Watch now" button; "Business Process Management with ARIS catapulted us into the big leagues with regard to process optimization." with a "Meet the customer hero" button; and "Optimize your order-to-cash process INFOGRAPHIC" with a "Download here" button. The infographic section includes the text: "The typical O2C process" and "Order-to-cash (O2C) is a crucial process that involves multiple departments and significantly impacts customer satisfaction and cash flow. If you're struggling to optimize your O2C process, ARIS Process Mining has got you covered. Understand what's working and what's not. Check out this infographic to learn more about the benefits of process mining in the O2C workflow!".
