

webMethods.io Integration Free Forever Edition

Accelerating your journey to the cloud at no cost

Fact sheet

Free trials are great, but 30 or 60 days are simply not enough time for an organization to explore the powerful capabilities of an iPaaS platform. To give you plenty of breathing room to build and deploy integrations in the cloud, webMethods.io Integration now comes in a „Free Forever“ edition.

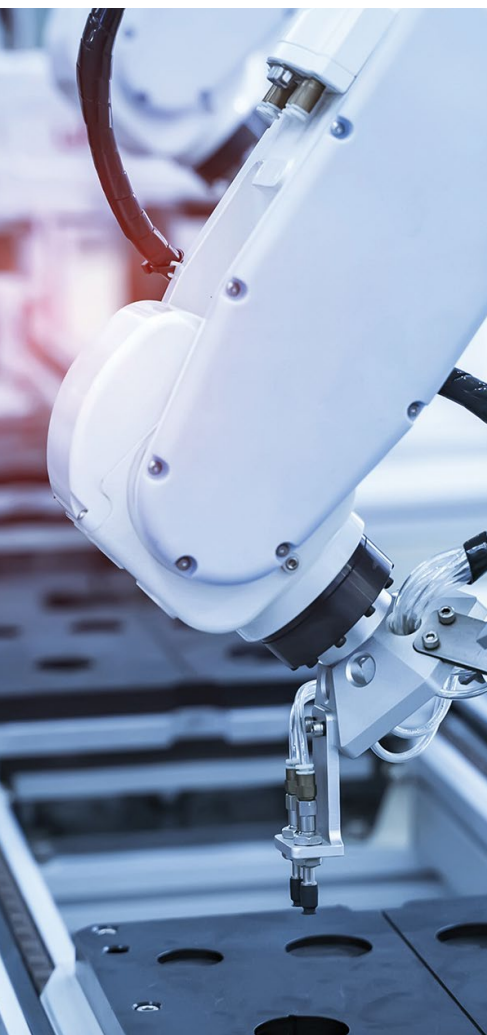

webMethods.io Integration helps you connect cloud-based and on-premises applications, accelerating your journey to the cloud. Integrate popular SaaS applications such as Salesforce®, LinkedIn® and Marketo® with your on-premise business backbone or simply discover the benefits of cloud-to-cloud integration. With webMethods.io Integration Free Forever Edition, you can skip the time limitations of a free trial and get started with iPaaS for free, forever.

Key benefits

Get started with webMethods.io Integration Free Forever Edition to enjoy all of the functionality available in the Basic version of the product, which includes up to 1,000 transactions per month.

Using webMethods.io Integration Free Forever Edition, you can:

- Quickly integrate SaaS applications using a simple drag-and-drop UI
- Scale on demand to meet business requirements
- Enable non-integration specialists to quickly configure integrations
- Lower maintenance and upgrade costs compared to on-premise deployments
- Enjoy faster time-to-value and integrations
- Experience the benefits of an iPaaS at no cost to you

Key features

Broad connectivity

webMethods.io Integration provides a rich gallery of pre-built connectors including market-leading CRM and ERP cloud-based applications, popular SaaS applications as well as connectors for all modern protocols including FTP/SFTP, RESTful endpoints, AMQP and others.

Easy workflow creation

Create sophisticated integrations in minutes with webMethods.io Integration's graphical user-friendly UI. With its drag-and-drop palette you can quickly design multi-step orchestration flows without coding.

Prebuilt integration recipes

You don't always have to build integrations from the ground up. webMethods.io Integration provides pre-built integration templates available to all customers that serve as the blueprint for integrations before moving onto increasingly complex use cases.

Tenant and role management

Tenant registration and self-service user and role management are among the key capabilities of webMethods.io Integration. After you register an account you can easily create additional users and roles as an administrator.

Responsive browser-based UI for all developers

Designed with ease of use in mind, our responsive browser-based user interface can be accessed using any modern browser. It supports guided development using wizards to help easily create integrations.

Mapping, transformation & enrichment

The webMethods Integration Platform is known for these. The same benefits are also provided to webMethods.io Integration users, including citizen developers. webMethods.io Integration offers drag-and-drop transformation and mapping so you can call operations that provide transformation and enrichment within your integrations.

Monitoring and reporting

Track how your integrations are running in real-time using the performance dashboard, which provides an overview of execution history. Additionally, monitor your transaction executions for ongoing operations as well as development and debugging of integrations.

Audit Logs and Alerts

Get full audit and error logs for transaction history and compliance. webMethods.io Integration also offers complete visibility into your webMethods.io systems. Real-time alerts notify you when there is an error and allow you to take action, by restarting or resubmitting your integrations from the point of failure.

Take the next step
