

Wipro's Software AG Practice

As organizations across each industry embark on technology transformation programs to effectively engage with the digital economy, Wipro is ensuring that these projects yield successful results based on our Software AG platform expertise, covering consulting, implementation, and managed services. Our team leverages multichannel integrations, IoT, APIs, the cloud, DevOps, and service-based implementations to deliver connected experiences and help clients develop a more agile and integrated enterprise.

**Wipro is a Global Strategic
Partner of Software AG.**

Wipro's Software AG product portfolio

- Business and IT portfolio transformation: ARIS and Alfabet
- Analytics and decision-making: Apama Streaming Analytics
- Application, B2B, API integrations, and microservices: webMethods Integration Server, webMethods Trading Networks, webMethods API Gateway, webMethods API Portal, and webMethods Microservices Runtime (MSR)
- Cloud services: Software AG cloud (webMethods.io Integration, webMethods.io API, and webMethods.io B2B)
- IoT platform: Cumulocity IoT
- Process automation: webMethods BPMS
- Managed file transfer: webMethods Active Transfer
- Monitoring, digital event-processing, and insights: Optimize for Process, Infrastructure, and B2B

Wipro's Software AG CoE

Wipro's offerings based on the Software AG digital integration platform enable enterprises to gain valuable business insights from their process and business data. With our solutions and expertise, clients can identify several operational and revenue opportunities, and execute intelligent actions at the right time. The foundation for these innovations is our dedicated Software AG Center of Excellence (CoE), which focuses on evaluating products, developing proofs of concept (PoCs), refining methodologies, and building solution accelerators and reusable components on Software AG products.

Solutions and accelerators

Wipro's Digital Integration as a Service (DaaS) offers services to build any-to-any integrations, covering everything from business systems and applications to the cloud and tech devices. It comes with a choice of operating models and includes a self-service portal that provides a unified view of integrations across the enterprise. The platform has several solutions to fast-track enterprises' integration programs, including:

- **Connected devices:** Wipro's automated platform leverages the Cumulocity IoT platform to deliver real-time insights for greater agility and lower operational costs by monitoring the asset condition and its location.
- **Modernization:** Our tools and solutions (automation software for platform provisioning, service template, cloud migration solution, and API Starter Kit) help customers build their integration platform faster.
- **AMS Solution Kit:** Wipro's utilities kit helps application support teams reduce manual efforts, meet SLAs, and reduce incident resolution times. The pack contains utilities that monitor the webMethods platform, identify issues, and help resolve them.

A rapid API lifecycle acceleration platform with an end-to-end API development, open APIs adoption, partner API integration, API DevOps and API marketplace

Success stories

We're delivering real-world benefits to clients with Software AG platforms:

Our predictive maintenance and location-based services solution helped a major high-tech enterprise achieve a **45% reduction in service maintenance calls**.

We led a top European paper manufacturer's phased adoption of the Software AG platform, **reducing any data risks** through a seamless partner and process-based migration.

When a leading utilities provider needed a **hybrid integration with a SaaS application**, we used webMethods.io and API Management to complete the project and enhance operations.
