

Strengthen digital integrations with the latest API innovations

Unlock digital assets and create new revenue streams with
Software AG's webMethods API Management platform

A robust API management platform empowers organizations to develop a 360 view of their API landscape, monetize their data, deliver services to the market faster, and offer better omnichannel experiences to their customers.

Software AG's webMethods API management platform puts all of this in reach by providing an effective way to plan, design, develop, secure, and analyze APIs. It helps businesses take control of their entire API lifecycle.

Wipro is a Global Strategic partner of Software AG with close to two decades of experience in implementing Software AG's suite of products for our customers, helping them accelerate customer-centric innovations, identify new operational efficiencies, and expand revenue streams. Wipro's end-to-end services built on the webMethods API Management platform comprise:

- **Advising:** Our team devises a plan for transforming operations based on our integration consulting expertise and will deliver an API products road map, a monetization strategy, and an API products fitment analysis.
- **Building:** We set up an API portal and platform to rapidly build, govern, and expose custom APIs, and also establish an API registry and repository to store, discover, and reuse APIs.
- **Management:** Wipro gives clients greater visibility across the end-to-end API life cycle, including API policies, access, relationships, dependencies, and subscription governance. We also optimize traffic and routing to back-end systems with webMethods API Gateway.
- **Deployment:** Our experts ensure operations meet regulatory compliance and security protocols, accelerate projects with ready-to-deploy integration tools, and help clients gain insights into how APIs are being used and current deployment trends.

Gain insights into customer needs, create new engagement models, and deliver seamless omnichannel experiences

Wipro's API Center of Excellence

Wipro's dedicated API Center of Excellence (CoE) focuses on proofs of concept, refining methodologies, and building solution accelerators and reusable assets on the webMethods.io iPaaS and webMethods API Management on-premise platform components. We leverage our delivery experience in digital transformation projects, deep industry knowledge, advisory expertise, and industry-renowned delivery models to help clients realize their business goals.

Getting the most from Software AG webMethods API Management

The Software AG webMethods API Management platform offers a host of components to maximize customers' API investments, and our CoE works with clients to further develop service offerings and solutions based on these components:

-  **API Portal** provides developers with access to the API ecosystem.
-  **API Gateway** securely exposes APIs externally for use in web, mobile, and IoT applications.
-  **CentraSite** catalogs and monitors APIs, and enforces company policies.
-  **Microgateway** manages traffic and secures microservices in a distributed environment.
-  **AppMesh** provides visibility and control over microservices-based apps.

Success Story

Our hybrid integration platform setup, management, and support with webMethods.io API improved an engineering, logistics, and energy holding company's productivity by exposing APIs to business partners and drove business user satisfaction.

About Software AG

Software AG is the software pioneer of a truly connected world. Since 1969, it has helped 10,000+ organizations use software to connect people, departments, systems and devices. Software AG empowers truly connected enterprises using

Integration & APIs, IoT & Analytics, and Business & IT Transformation. Software AG's products establish a fluid flow of data that allows everything and everyone to work together. The company has about 4,700 employees across more than 70 countries.
