

ADABAS & NATURAL EDUCATION SERVICES SKILLS FOR THE FUTURE

Stay ahead of the generational change by training new talent

Let us empower your team to develop, maintain and operate your mission-critical Adabas & Natural applications today and far into the future. Our education services and managed services can help you quickly train new talent or outsource with confidence.

More than 80 percent of Adabas & Natural systems in use today are business-critical. Given the reliably high levels of performance, availability and security of these systems, the majority of senior IT managers consider Adabas & Natural a core part of their long-term application strategy.

However, workforce consolidation, attrition, retirement, hiring freezes and new IT staff less interested in working with infrastructure elements may lead to skill shortages in many companies. Fortunately, this generational shift in skills does not need to concern you nor alter your plans to leverage Adabas & Natural well into the future because we can help.

With Adabas & Natural Education Services, we can help you quickly educate new staff with role-based content and tools delivered in a variety of learning formats. Alternatively, you can rely on us to do the work for you with Adabas & Natural Managed Services—professional services, support and operations provided locally or remotely.

“Software AG’s Natural trainings impart a fast learning, answer the right questions and prepare the participants for the relevant daily challenges.”

— **Jonas Hellmann** | Alte Oldenburger Krankenversicherung

Whether you want to ramp up new talent quickly or let us do the work, you can confidently assure your organization that your Adabas & Natural systems are here to stay.
