

CONNX DATA VISUALIZATION

Put enterprise data in the hands of your users with CONNX KPiSync, CONNX Add-on for Excel® and CONNX Infonaut

For data to be useful, you first have to see it

Help your IT teams put the power of data access right where it is needed most—in the hands of the user. CONNX data visualization solutions help people view their data in a meaningful way whether they want to use the desktop to handle their own queries or visualize key business metrics on a mobile device.

While accessing your data sources is the first step to making business decisions, how you visualize and assess that data is vital to making those business decisions meaningful. Put your data into meaningful, actionable views and reports tailored to the unique needs your audience using CONNX KPiSync, CONNX Add-on for Excel and CONNX InfoNaut.

Help your users visualize key business metrics on any smart phone, tablet or PC in real time with KPiSync. The CONNX Add-on for Excel allows people to view and report on all their data sources using the popular business intelligence tool, Microsoft® Excel. They can build and manage their own queries and reports with InfoNaut, an enterprise desktop querying and reporting tool.

Don't forget, you can also opt for the reporting platform of your choice or grant web access to your enterprise data with CONNX DB Adapters that can provide access to virtually every legacy, relational, non-relational, big data and cloud data source out there.

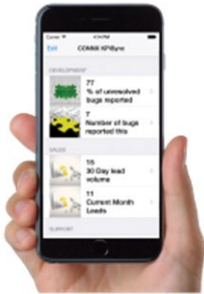

Key benefits

- Visualize key business metrics on any device in real time
- Simplify and extend reporting to all data sources by allowing users to view and analyze data from Excel
- Delegate querying to the end-user, reducing internal support requests and freeing up valuable IT time
- Choose what works best for your organization, plug into any application, report writer or development tool that is ODBC, OLEDB, JDBC®, J2EE® or .NET® compliant
- Provide web-enabled reporting for employees, partners and customers

KPiSync

Visualize your key business metrics on any device in real time with CONNX KPiSync. This mobile business intelligence application provides users a quick and easy method of delivering Key Performance Indicators (KPIs) from all facets of a business to people using any device (i.e., smartphone, tablet or PC).

CONNX KPiSync keeps you in touch with your critical business information from any corporate application or data store, any time, all the time and in real time, whether you are in the office, on the go or at home. KPiSync makes it simple to keep track of your critical business metrics simply by defining a key performance indicator which will query your enterprise data. These indicators are then pushed to your desktop, laptop, tablet or mobile devices, using our secure hosted cloud-based solution.

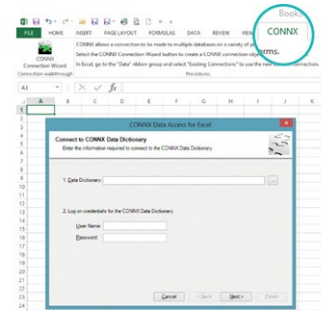

CONNX KPiSync

Add-on for Excel

If you prefer using Microsoft Excel for viewing, reporting and manipulating your business data, then CONNX Add-on for Excel is the perfect solution. It allows any user to view and extract data from 150+ supported databases in Excel and use all Excel capabilities without any worry of altering the source data.

Enhanced Excel reporting also allows you to connect and create joins between tables from different data sources. With the integrated CONNX Add on for Excel, in two clicks you'll have streamlined accessibility wherever your data resides.

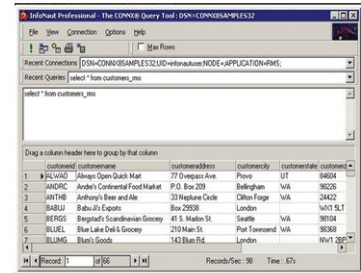

CONNX Add-on for Excel

InfoNaut

Build and manage your own queries and reports with CONNX InfoNaut Professional. This easy-to-use, desktop query and data reporting tool lets you access the full scope of enterprise data contained in existing relational and non-relational databases throughout your organization.

CONNX InfoNaut Professional features an intuitive query and SQL statement builder with the ability to save queries in a wide range of file formats including XML®, Microsoft Query®, Excel, HTML, ASP, CSV, SQL and TXT. Saved queries can be shared throughout the organization without the need for recreating them.

With the report writer in CONNX InfoNaut Professional, you can build customized reports from queries or table information. You can also add charts, graphs, graphics, tables and clip art into your reports thanks to the OLE capabilities. Reports can be saved as PDF, HTML or Excel files, as well as TIF, RTF, CSV and TXT formats for easy sharing and distribution.

CONNX InfoNaut

Visualize data from a variety of data sources in a meaningful way with CONNX KPiSync, CONNX Add-on for Excel and CONNX InfoNaut.

ABOUT SOFTWARE AG

The digital transformation is changing enterprise IT landscapes from inflexible application silos to modern software platform-driven IT architectures which deliver the openness, speed and agility needed to enable the digital real-time enterprise.
