We, in our dealings, are self-regulated by a code of conduct as enshrined in the “Tata Code of Conduct”. We request your support in helping us adhere to the code in letter and spirit. We request that any violation or potential violation of the code by any person be promptly brought to the notice of the Local Ethics Counselor or the Principal Ethics Counselor or the CEO of TCS. All communication received in this regard will be treated and kept as confidential.

**What is 20-20-Action?**

Conventional MFT Development

Action Features

5 Step Process for Action

**Demo**

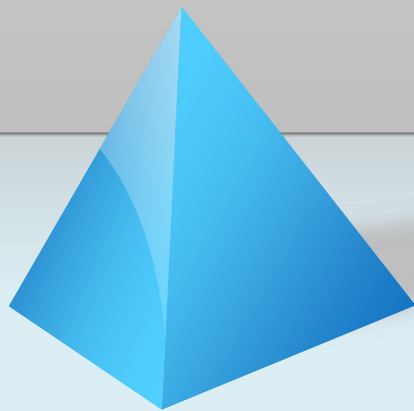

## What is 20-20 Action?

Development Accelerator	A sophisticated product to accelerate the development of Active Transfer [Managed File Transfer] based interfaces
Development Speed – 20 Min->20Sec	A conventional MFT development that takes 20 minutes per interface is now reduced to just about 20 Seconds per interface
Technology stack	Predominantly the tool is built over webMethods technology, utilizing the API's, softwareAG Java package, JQuery and core Java.
Fool-proof and Simple	The simple accelerator can be used by MFT developers without knowledge on Active Transfer product – The intuitive screen and intelligent validations makes it fool-proof

# Typical MFT Configuration

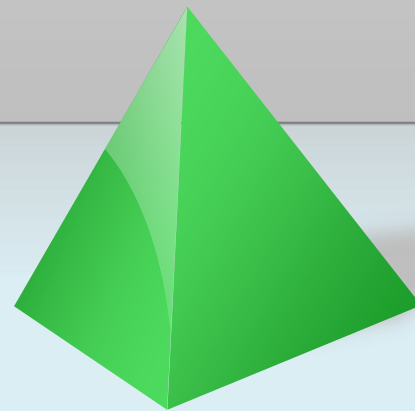

## User

This configuration is to setup the Users (internal and external) in MFT system – The user can be an enterprise application or an external Vendor

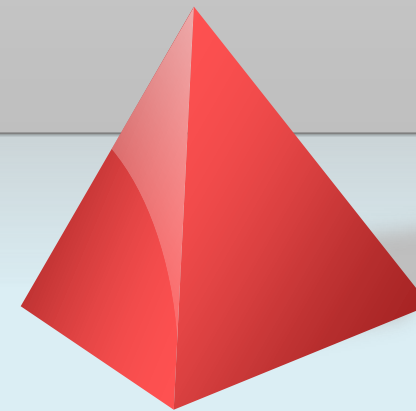

## Virtual File System

This configuration is define the file movement locations in terms of Virtual file systems. The VFS can have one to many relationships with Vendors i.e. [One Vendor can have many VFS locations for each scenario]

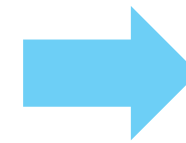

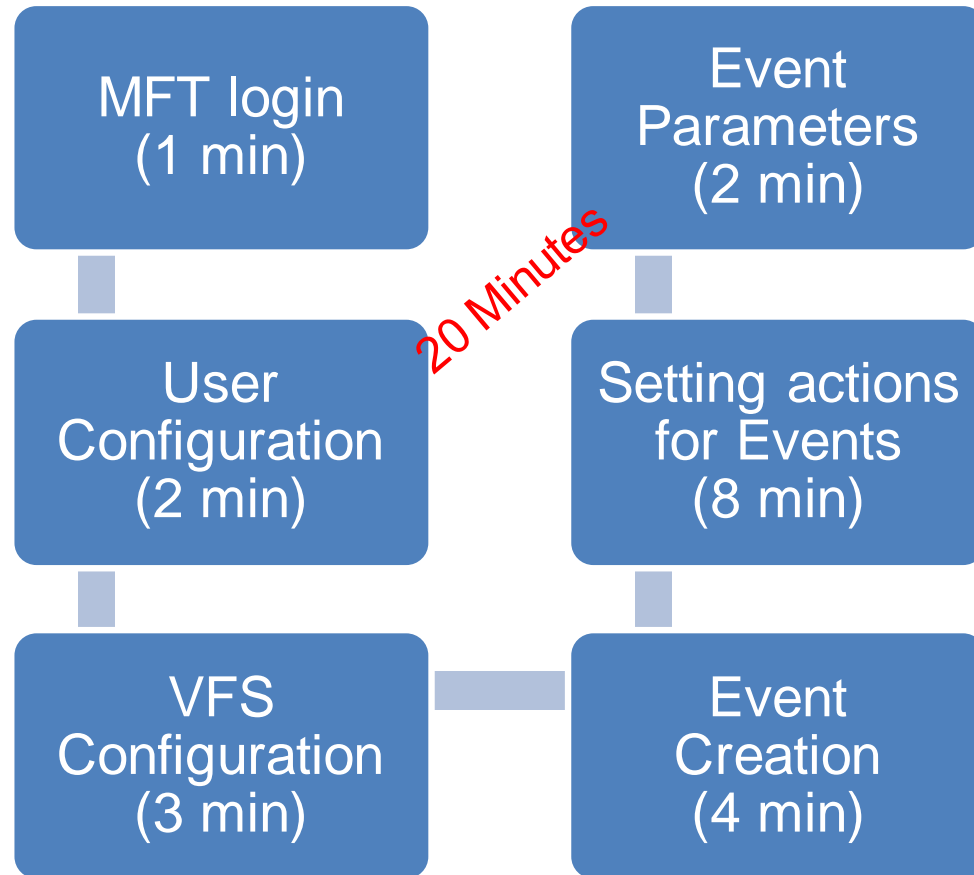

## Events & Action

These are the inbound and outbound actions which can be either Scheduled or Post-processing based. The most common actions are Copy, Archive, encode/decode and Move.

# Conventional MFT Development

The below is an indicative timelines for developing one Managed File Transfer interface in Active Transfer. It is assumed that the developer is well-verse with the Active Transfer product and the configuration details are readily available to be configured

   
**ActiveTransfer**  
State of the art Managed File Transfer(MFT) Solution

## Benefits of 20-20 Action

### Speed

Faster time to market – 20 minutes to 20 seconds development time reduction

### EASY

Simple and intuitive GUI – No need to have prior Active Transfer skills for development

### Documentation

The inputs excel sheets may serve as the source documentation for MFT interfaces

### Consistency

Through pre-loaded values in the template excel, the development is made consistent across developers

### Certificates

Security certificates upload for any B2B interfaces to be carried out manually from within ActiveTransfer

### Complex Events

Non-standard Events to be configured manually from within ActiveTransfer

Thank you
